## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**JANUARY 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

8C03-501-012

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 1

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
JANUARY, 1962

Summary

The industrial composite index of employment declined from 117.8 in December to 115.2 in January. Most major industrial divisions reported decreases, although the drop took place largely in trade, construction and transportation, storage and communication. The declines were partly offset by a moderate increase in manufacturing and a small rise in finance, insurance and real estate.

In general, the seasonally adjusted indexes for the major industry divisions were unchanged, or rose slightly from December. Forestry alone reported gains of significance. The seasonally adjusted index for manufacturing recorded a slight increase from December to January. The major components, durable and non-durable goods manufacturing, also showed little change. The only significant decreases were recorded in mining and transportation, storage and communication.

The industrial composite of average wages and salaries rose by \$2.17 over the month to \$79.25 in January. A large increase from December to January is usual, average earnings generally falling during the year-end holiday week. The January figure was \$2.26 above January, 1961.

Manufacturing

In durable goods manufacturing, wood products and electrical apparatus and supplies reported moderate increases, but the remaining components showed month-to-month changes that differed only slightly from the normal seasonal patterns. In iron and steel products, some strengthening was indicated in the seasonally adjusted indexes for agricultural implements, heating and cooking appliances, machinery and sheet metal products, but this was more than offset by contra-seasonal declines in fabricated and structural steel and primary iron and steel. In transportation equipment, only aircrafts and parts showed improvement. The increase in non-ferrous metal products and the decrease in non-metallic mineral products were seasonal.

A slight rise was recorded in the adjusted non-durables index, in which food and beverages, tobacco products, printing and publishing and miscellaneous manufacturing showed improvement. However, the overall gain was modified by smaller-than-seasonal increases in clothing and rubber products. The changes in the remaining industries were about seasonal in size.

Non-Manufacturing

The movements of the seasonally adjusted indexes for the non-manufacturing industries varied. Forestry recorded a relatively large rise, as employment in British Columbia decreased much less than usual for January. Mining declined, largely as a result of layoffs in Nova Scotia. The adjusted index for construction was unchanged from December, with building and general engineering and highway,

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision

bridge and street construction recording reductions that were seasonal in extent. A drop in transportation, storage and communication was reported mainly in Quebec. The service industries surveyed reported a small decrease, while there were moderate increases in the remaining major industry divisions.

#### Employment by sex

The industrial composite index of employment for men fell over the month by 2 p.c. The percentage decline among female workers was slightly greater, reflecting, in the main, large decreases in trade where women form a high proportion of the total employees. The January index for men was up by 2.9 p.c. from the same month last year, while that for women was higher by 4.4 p.c.

#### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by \$2.17 over the month to \$79.25 in January. Most major industry divisions recorded increases, with that of \$9.47 in construction being the most pronounced. The large rise in construction reflected a return to a more usual work week, the hours having been greatly reduced in December, while seasonal layoff of unskilled workers in January was also a factor. Large increases from December were recorded in mining, manufacturing and trade. Only forestry and transportation, storage and communication reported declines.

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS, JANUARY, 1962

Important  
Instructions on other side

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

1. If you had any employees drawing pay in last pay period(s) in above month, please fill in this form. If not, when will you operate? .....

2. Employees drawing pay in last pay period(s) in month, and their gross payroll to nearest dollar.

A. Salaried employees - No. .... B. Wage-earners - No. .... C. Total employees - No. ....

Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payroll - \$ .....

3. Payroll detail for totals in Question 2C.  
(Report only for last pay period(s)  
in month.)

3. Payroll detail for totals in Question 2C. (Report only for last pay period(s) in month.)	Dates of pay period(s)		Employees receiving pay	Gross earnings in pay period(s) (omit cents)	Office use
	From	To			
REGULAR EMPLOYEES — full and part time:					
A. Paid monthly .....				\$ .....	
B. Paid half-monthly — second half only .....					
C. Paid fortnightly — last two weeks only .....					
D. Paid weekly — last week in month only .....					
E. Other period (specify) .....					
CASUAL WORKERS, employed for part of last week in month, paid by:					
F. Day: Man-days: No. ....					
G. Hour: Man-hours: No. ....					
OTHER PAYMENTS — state type:					
H. ....					
I. ....					
J. ....					
TOTALS (to agree with 2C) .....					

4. Female Employees: Number

A. Women on salary .....  
B. Women wage-earners .....  
C. Total women .....

Change name or address if necessary.

Request file copies, if required.

5. Report for male and female wage-earners whose hours are recorded.

A. Pay period from ..... to .....  
B. No. of days establishment operated in this pay period .....

C. Wage-earners whose hours are recorded: Office use  
No. ....

D. Hours worked and hours of paid absence:  
No. ....

E. Gross wages paid for these hours: (omit cents)  
\$ .....

6. Number of days and hours in standard work week of your establishment for:

A. Wage-earners: Days ..... Hours .....  
B. Salaried staff: Days ..... Hours .....

7. If a public holiday was observed in reported pay period(s), state numbers of employees absent:

With pay ..... Without pay .....

8. Please explain big differences from last report in employees, pay, hours, etc.

Signature ..... Date .....  
9-ES1a - Monthly Employment Report  
Required under the Statistics Act of Canada, Chap. 257, R.S.C. 1952

**JANUARY**

**O. H. M. S.**

NO POSTAGE  
REQUIRED

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** — Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** — Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** — Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** — Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** — Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** — State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**FEBRUARY 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

8003-501-022

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 2

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

## EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS

### Summary - February, 1962.

The industrial composite index of employment (1949=100) declined from 115.2 in January to 114.7 in February. The changes in most major industrial divisions were less than 0.5 p.c. The exceptions were forestry, construction and trade which showed reductions of 1 p.c. or more, mainly owing to seasonal influences.

The seasonally-adjusted industrial composite index of employment decreased slightly. Except for forestry, the adjusted indexes for the major industrial divisions showed little change. There were offsetting movements in mining all of which occurred in the Atlantic Region. Employment increased substantially in coal mining as workers were recalled after major layoffs in January. These gains were more than offset by a temporary closing of a large iron mine. Employment levels were up in most components of durable goods manufacturing, but with industrial disputes in motor vehicles, the adjusted index was down slightly. Larger-than-usual decreases in Quebec and smaller-than-usual increases in British Columbia brought about the decline in forestry. The drop may reflect changing seasonal patterns in the two provinces not taken into account in the adjustment process.

The industrial composite of average weekly wages and salaries rose by 91 cents over the month to \$80.13 in February. This was \$2.38 above February 1961. Per capita earnings in all major industrial divisions were up from January except in mining, where they fell by 67 cents. A large increase in forestry was due mainly to a change in the provincial distribution of workers, reflecting particularly the expansion in employment in British Columbia already mentioned, average earnings in that province exceeding the national average.

The payroll index, at 215.9, was up slightly from January, and was 6.6 p.c. above the same month last year.

### Employment Review 1960, 1961.

The seasonally adjusted industrial composite index reached the lowest point for recent years in March 1961, when it was 3.7 p.c. below the October 1959 cyclical peak of 120.7. By July 1961 the composite had recovered approximately half its losses and by the end of the year was only slightly below its pre-recession level. Following the usual pattern during periods of recession, the declines from the 1959 high took place largely in the goods producing industries. The greatest percentage decline was in forestry. Mining, durable goods manufacturing and construction also registered percentage decreases significantly greater than that for the composite. However, non-durable goods manufacturing, as usual only slightly affected by cyclical influences declined by less than 2 p.c. Although forestry recorded the greatest percentage decrease, durable goods manufacturing, because of the large number employed therein, accounted for 38 p.c. of the overall decline. The reductions recorded in durables, forestry and construction together made up 70 p.c. of the losses.

In the service producing industries, employment continued to rise

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

in finance, insurance and real estate during the 1960 general decline but levelled in trade and in the service industries surveyed. Public utility operation declined slightly, while there was a large drop in transportation, storage and communication. The decrease in the latter industrial division, particularly in the railway component, was partly a reflection of general business conditions, and partly a result of long-term factors.

As already stated, almost half the loss in the composite was made up in the first four months of the recovery period. Most of the expansion took place in the cyclically sensitive goods producing industries. Forestry advanced rapidly in the first four months, rising by almost 30 p.c. Over the same period, non-durable goods manufacturing rose much more rapidly than in previous recoveries, accounting for over 20 p.c. of the overall increase.

By the end of the year, the recovery was centered in durable goods manufacturing and construction, although in neither was the advance sufficient to bring employment in those divisions to pre-recession levels. Despite a strong start, both forestry and mining lost ground later in the year. Steady increases were recorded in most service producing industries, with expansion in the service industries surveyed being particularly strong. Trade declined slightly towards the end of the period, while a small rise was recorded in transportation, storage and communication.

### Manufacturing

The marked recovery in manufacturing dating from March 1961 was reflected in both major components. Until July, recovery was more vigorous in non-durables after which durables made a marked upsurge. Non-durables also advanced but at a much slower rate than in the first four months of recovery.

Almost all components of durable goods manufacturing recorded good gains during the year. The increases were greatest in transportation equipment, electrical apparatus and supplies and non-metallic mineral products, while iron and steel and wood products reported moderate gains. Non-ferrous metal products showed little strength.

In transportation equipment, marked increases after March 1961 were recorded for all component industries, with the percentage gains in shipbuilding and repairing being most impressive. The gains in the iron and steel group were largely modified by the erratic movement of the agricultural instruments industry. Facing reduced orders in the wake of the Western drought the industry made large downward revisions in its production staffs. Fabricated and structural steel, heating and cooking appliances and machinery products reported steadily increasing employment. Iron castings and primary iron and steel advanced strongly in the second and third quarters, but slackened in the fourth quarter as export demand for primary iron weakened. Sheet metal products moved somewhat erratically throughout the year, although the general trend was downward.

The cyclically sensitive industries in non-durables were responsible for most of the rise in that division. The strongest advances were made in rubber products and miscellaneous manufacturing industries. However because of the small weight of these industries the effect on non-durables was small. Leather, textile and clothing products reported steady increases over the period, which contributed importantly to the overall gains in non-durables. Paper products and food and beverages, two of the larger industries in the division, showed little change over the year.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers  
Canada, by Industrial Division

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries - Concluded

Industries	Esti- mated cov- erage(w)	Employment Indexes				Average Weekly Wages and Salaries				Employees Reported February, 1962.
		Feb. 1962	Jan. 1962	Feb. 1961	Feb. 1960	Feb. 1962	Jan. 1962	Feb. 1961	Feb. 1960	
	p.c.	1949 = 100				\$	\$	\$	\$	no.
Manufacturing — concluded:										
Transportation equipment .....		108.3	109.6	105.2	112.8	95.76	93.30	90.26	86.33	121,416
Aircraft and parts .....		265.8	265.9	262.1	239.3	97.27	96.87	95.65	91.90	30,619
Motor vehicles .....		99.6	109.2	105.1	118.2	112.98	103.98	98.64	92.80	27,754
Motor vehicles parts and accessories .....		108.0	106.4	100.5	114.9	93.24	92.33	89.30	85.20	19,220
Railroad and rolling stock equipment .....		55.3	55.5	53.1	61.4	84.95	83.08	85.74	79.29	19,837
Shipbuilding and repairing .....		137.6	131.5	123.2	134.6	86.17	84.63	80.97	78.78	20,999
Non-ferrous metal products .....		122.5	122.1	123.0	127.8	93.39	93.71	91.59	88.84	52,342
Aluminum products .....		132.0	128.9	132.5	135.9	91.09	91.54	87.92	84.21	8,079
Brass and copper products .....		102.5	101.9	100.3	104.6	89.22	89.33	85.94	84.12	8,313
Smelting and refining .....		137.4	137.9	142.4	149.7	102.03	102.34	99.76	96.71	27,502
Electrical apparatus and supplies .....		142.1	140.7	125.4	135.9	89.53	89.73	87.34	83.61	78,545
Heavy electrical machinery .....		102.5	102.0	96.1	109.9	96.34	96.26	93.42	90.34	17,381
Telecommunication equipment .....		257.6	254.3	210.6	212.9	87.60	83.14	83.11	81.02	21,232
Non-metallic mineral products (k) .....		134.6	134.3	124.5	133.6	87.04	86.24	82.21	80.01	35,904
Clay products .....		80.1	79.8	73.6	89.6	78.07	79.00	75.58	75.47	4,425
Glass and glass products .....		161.5	158.4	146.5	146.4	84.18	84.49	79.81	77.30	10,073
Concrete products .....		201.6	202.3	194.4	218.3	83.83	82.01	79.55	76.66	7,483
Products of petroleum and coal .....		133.3	137.3	135.6	133.0	119.55	120.18	117.23	111.84	15,729
Petroleum refining and products .....		141.9	141.0	133.9	135.1	120.17	120.78	117.89	112.64	15,293
Chemical products .....		131.3	131.1	129.1	130.6	97.56	97.34	93.39	89.49	54,854
Medicinal and pharmaceutical preparations .....		122.7	122.2	116.1	120.0	85.13	84.95	82.77	78.84	8,360
Acids, alkalis and salts .....		153.8	154.2	150.9	148.3	108.39	109.44	105.18	101.33	9,520
Other chemical products (l) .....		129.2	128.3	127.5	129.3	97.58	97.01	92.68	88.91	36,974
Miscellaneous manufacturing industries .....		139.0	138.8	129.6	127.6	73.51	73.15	72.47	68.74	34,926

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salariat Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**MARCH 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

8003-501-032

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 3

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings** — Monthly — Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings** — Monthly — Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income** — Monthly — Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries** — Semi-Annual — Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls** — Annual — Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings** — Annual — Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing** — Annual — Preliminary Report — Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing** — Annual — Final Report — Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
MARCH, 1961

Summary

Employment in almost all major industrial divisions recorded increases in March. However, the overall gain was moderate, due principally to large decreases in forestry. The March industrial composite index of employment (1949=100) was 115.1 only slightly above the February total of 114.7. Seasonally adjusted, the composite was virtually unchanged at 120.4. During the last three quarters of 1961, the adjusted index gained steadily, after reaching a low of 116.2 in March. However, since December 1961, the index has shown little movement.

The seasonally adjusted indexes for most major industrial divisions were up from February. Only the indexes for forestry, public utility operation and transportation, storage and communication declined. The reduction in forestry may reflect a changing seasonal pattern. Mining recorded moderate gains, despite extensive lay-offs of coal miners in Nova Scotia. An increase in construction reflected a larger than seasonal rise in building and general engineering. Manufacturing was unchanged. In durables, smaller than seasonal increases in transportation equipment, wood and non-ferrous metal products were outweighed by gains in other sectors. Most components of non-durables showed greater than seasonal increases, but these gains were largely offset by a large drop in primary textiles. Trade, finance, insurance, and real estate and the service industries surveyed showed moderate gains.

The industrial composite of average weekly wages and salaries, at \$80.33, was only 12 cents above February, but \$2.69 higher than in March 1961. The payroll index rose by 0.5 p.c. to 217.1 in March. This figure was 7.3 p.c. higher than a year ago.

EMPLOYMENT

Manufacturing

The seasonally adjusted manufacturing index at 111.7 was unchanged from February. Employment in this industrial division has levelled in recent months after marked advances from the low of 107.0 recorded in March 1961. Levelling is evidenced in the adjusted indexes for both major components of manufacturing. Since December 1961, the adjusted indexes for durable and non-durable goods manufacturing have risen by only 0.2 and 0.3 p.c. respectively.

All principal components of durable goods manufacturing recorded higher levels of employment in March, although in no case did the changes differ materially from the seasonal movement. Electrical apparatus and supplies, iron and steel and non-metallic mineral products showed increases that were slightly larger-than-average. Most components of the iron and steel group recorded changes that were of seasonal size. Only iron castings, which rose contra-seasonally, showed a significant gain. The rise in the non-metallic mineral product group was modified to a large extent by industrial disputes in the glass products component. The strength shown in electrical apparatus and supplies and in non-metallic mineral products has been typical of these industries since the first quarter of 1961.

The gains in the above-named industries were largely offset by less-than-

---

**NOTE:** Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

average increases in transportation equipment, wood and non-ferrous metal products. In transportation equipment this situation resulted largely from a contra-seasonal decline in aircraft and parts, although a less than seasonal rise in motor vehicle parts and accessories was also a factor. A large increase in shipbuilding and repairing was about average in size, as was a smaller rise in railroad and rolling stock equipment. Only motor vehicles in the transportation equipment group showed a greater-than-seasonal advance.

In general, employment in non-durables tended to rise from February to March, although there were declines in tobacco, leather, textile and petroleum products. Increases in most industries were seasonal in size or larger, with the most substantial gains being in food and beverages, clothing and miscellaneous manufacturing industries. However a reduction in textile products, caused by industrial disputes in Quebec, was a major factor in offsetting the gains.

#### Non-Manufacturing Industries

The movements of the adjusted indexes for non-manufacturing industries were mixed. In the goods producing industries, mining and construction recorded moderate gains, while forestry declined. There were offsetting movements in mining. Greater than seasonal increases were recorded in metal mining, mainly due to the resumption in operations of Newfoundland iron mines closed in February. Employment in oil and natural gas levelled between February and March instead of declining as has been usual in recent years. However, the effect of the strength shown in these industry groups was largely offset by extensive layoffs of coal miners in Nova Scotia. Employment in construction rose strongly as larger-than-usual increases were recorded in the building and general engineering component. Forestry declined, reflecting greater-than-usual decreases in Quebec and the Atlantic region. However, there is some evidence that the low March figure may be associated with a changing seasonal pattern.

In the service producing industries, there were increases in trade, finance, insurance and real estate and the service industries surveyed. Temporary increases in British Columbia accounted for part of the rise in trade. Employment in the transportation, storage and communication division was virtually unchanged. Public utility operation showed a small decline.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers  
Canada, by Industrial Division

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

\* UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported
		Mar. 1962	Feb. 1962	Mar. 1961	Mar. 1960	Mar. 1962	Feb. 1962	Mar. 1961	Mar. 1960	
	%	1949 = 100				dollars				number
Forestry (chiefly logging) .....	76	47.0	68.2	41.8	60.9	84.12	81.93	79.24	73.41	34,341
Mining .....	96	113.7	113.7	113.0	121.3	93.87	93.65	95.33	94.35	100,377
Metal mining .....		129.1	127.3	130.3	133.5	93.97	93.91	98.47	95.82	61,032
Gold (a) .....		68.2	68.3	70.2	72.6	81.58	81.23	79.44	76.44	15,532
Other metal (b) .....		185.6	182.0	186.3	199.9	104.91	105.08	105.15	102.39	45,500
Iron .....		241.7	218.0	243.3	258.9	115.95	115.19	111.70	105.01	8,067
Uranium .....		..	..	..	..	116.95	117.09	119.16	112.26	4,856
Fuels .....		83.9	83.4	82.7	97.2	103.95	103.23	94.22	95.39	25,593
Coal .....		34.1	39.6	34.8	49.6	75.75	72.58	62.33	73.29	8,439
Oil and natural gas .....		297.2	297.5	289.0	302.1	117.83	120.70	110.73	111.01	17,154
Non-metal (c) .....		131.1	126.4	123.5	118.3	88.98	88.18	86.75	84.07	13,752
Asbestos .....		131.6	130.5	176.2	170.5	97.98	96.94	93.06	93.08	6,832
Manufacturing .....	92	109.6	103.9	104.9	109.0	83.21	82.74	80.36	73.04	1,186,227
Durable goods (u) .....		113.2	112.0	107.0	115.0	89.63	89.23	86.18	83.74	558,924
Non-durable goods (u) .....		106.5	106.3	103.2	103.8	77.49	77.01	75.30	72.69	627,303
Food and beverages .....		105.1	103.9	102.7	103.2	74.02	73.45	72.99	70.46	147,260
Meat products .....		127.7	127.9	127.6	130.0	82.69	81.13	83.30	78.35	28,936
Dairy products .....		113.2	115.5	116.3	116.3	69.03	69.11	66.39	63.93	14,476
Canned and cured fish .....		83.1	77.3	76.3	76.0	52.35	43.31	49.46	50.63	9,437
Canned and preserved fruits and vegetables .....		77.7	77.6	70.5	70.3	63.43	69.75	67.31	67.13	10,390
Grain mill products .....		93.3	97.3	93.6	100.7	79.56	79.22	77.43	74.13	9,255
Bread and other bakery products .....		109.0	107.9	103.2	103.5	67.77	67.71	67.03	65.71	22,417
Biscuits and crackers .....		90.3	89.6	90.9	84.0	64.72	64.26	59.39	59.16	6,710
Distilled and malt liquors .....		92.4	91.5	94.7	97.1	100.65	99.63	93.30	92.05	12,926
Other beverages (d) .....		139.3	136.9	135.4	132.7	73.53	72.59	71.30	69.10	10,014
Confectionery .....		83.4	84.4	82.1	85.9	59.12	53.77	53.76	56.55	8,097
Tobacco and tobacco products .....		109.1	114.1	90.3	89.2	73.30	72.20	74.47	71.76	11,105
Rubber products .....		101.5	100.3	94.0	105.0	35.31	35.32	31.39	79.71	20,143
Leather products .....		90.2	90.9	37.6	34.3	56.47	56.75	53.90	52.41	29,924
Boots and shoes (except rubber) .....		97.7	93.7	95.3	92.2	54.29	54.59	51.39	50.05	20,366
Other leather products (f) .....		76.5	76.3	74.0	71.3	61.50	61.75	59.57	57.70	9,053
Textile products (except clothing) .....		77.9	30.6	76.4	78.0	66.47	65.75	64.14	62.28	53,279
Cotton yarn and broad woven goods .....		75.1	74.9	69.6	70.4	63.79	63.43	60.53	59.05	18,462
Woollen goods .....		53.7	59.6	59.1	62.0	62.43	61.19	60.46	53.13	8,349
Synthetic textiles and silk (t) .....		78.5	39.3	81.3	34.3	72.39	71.03	71.35	68.69	13,432
Clothing (textile and fur) .....		93.6	93.0	91.0	91.3	52.72	52.30	50.42	49.19	101,720
Men's clothing .....		95.4	94.3	91.5	91.2	51.43	51.09	50.24	43.19	33,764
Women's clothing .....		103.9	103.7	102.7	99.0	54.29	54.53	51.33	50.70	28,583
Knit goods .....		73.6	73.4	70.7	73.3	51.57	51.56	43.33	43.50	18,917
Fur goods .....		62.1	53.6	62.5	65.4	30.43	72.71	74.40	63.34	2,910
Wood products .....		102.7	101.3	96.2	102.3	71.69	71.22	69.37	67.25	95,904
Saw and planing mills (g) .....		103.9	103.1	97.0	103.6	74.13	73.56	72.13	69.71	60,896
Furniture .....		111.4	110.9	104.8	110.0	63.66	63.45	65.60	64.51	25,690
Other wood products (h) .....		79.2	77.3	75.7	82.0	63.79	63.51	62.06	59.67	9,313
Paper products .....		121.0	120.7	113.6	119.3	96.78	96.52	94.17	89.69	90,333
Pulp and paper mills .....		120.3	120.3	119.4	120.0	104.46	104.43	102.05	96.61	63,410
Other paper products (i) .....		122.5	121.6	116.7	119.4	79.04	73.09	75.27	72.30	27,423
Printing, publishing and allied industries .....		126.2	125.1	123.5	123.4	90.63	89.54	86.99	85.39	61,770
Iron and steel products .....		104.3	103.4	100.3	108.9	94.47	93.74	90.90	83.19	170,834
Agricultural implements .....		63.3	62.1	69.2	73.3	96.69	97.30	92.94	87.92	11,233
Boilers and plate work .....		109.6	107.2	107.9	116.1	93.41	92.42	87.04	86.95	6,773
Fabricated and structural steel .....		146.9	147.3	145.7	143.3	95.50	94.06	93.60	89.30	11,013
Hardware and tools .....		104.5	102.9	97.3	101.3	83.47	82.54	80.65	79.43	12,006
Heating and cooking appliances .....		93.0	97.6	83.6	100.3	80.36	80.20	73.37	76.19	8,414
Iron castings .....		92.1	90.3	89.1	95.2	91.22	90.35	84.40	83.62	13,232
Machinery (j) .....		107.4	105.9	102.0	107.1	90.54	89.21	87.34	84.33	33,309
Industrial machinery (r) .....		121.5	119.3	111.5	113.4	91.05	89.30	83.02	85.23	26,344
Primary iron and steel .....		113.7	117.3	112.4	126.0	107.37	107.90	105.07	100.31	36,111
Sheet metal products .....		105.9	104.0	100.2	104.3	92.54	90.79	89.00	86.59	16,636
Wire and wire products .....		110.1	109.7	106.7	119.2	93.63	93.31	90.76	89.51	8,571

MARCH, 1962

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

Important  
Instructions on other side

1. If you had any employees drawing pay in last pay period(s) in above month, please fill in this form. If not, when will you operate? .....
2. Employees drawing pay in last pay period(s) in month, and their gross payroll to nearest dollar.
- A. Salaried employees - No. .... B. Wage-earners - No. .... C. Total employees - No. ....
- Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payroll - \$ .....

3. Payroll detail for totals in Question 2C.

(Report only for last pay period(s) in month.)

REGULAR EMPLOYEES - full and part time:	
A. Paid monthly .....	
B. Paid half-monthly - second half only .....	
C. Paid fortnightly - last two weeks only .....	
D. Paid weekly - last week in month only .....	
E. Other period (specify) .....	
CASUAL WORKERS, employed for part of last week in month, paid by:	
F. Day: Man-days: No. ....	
G. Hour: Man-hours: No. ....	
OTHER PAYMENTS - state type:	
H. ....	
I. ....	
J. ....	

4. Female Employees:

	Number
A. Women on salary .....	
B. Women wage-earners .....	
C. Total women .....	

Change name or address if necessary.

Request file copies, if required.

Signature ..... Date ..... Official title ..... Required under the Statistics Act of Canada, Chap. 257, R.S.C. 1952

5. Report for male and female wage-earners whose hours are recorded.
- A. Pay period from ..... to .....
- B. No. of days establishment operated in this pay period .....
- C. Wage-earners whose hours are recorded: No. .... Office use
- D. Hours worked and hours of paid absence: No. ....
- E. Gross wages paid for these hours: (omit cents) \$ .....

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page j.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**APRIL 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

8003-501-042

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 4

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 — Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 — Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 — Estimates of Labour Income**—Monthly—Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 — Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 — Review of Employment and Payrolls**—Annual—Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 — Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 — Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 — Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 — Labour Income, 1926-58**—Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
APRIL, 1962

Summary

The industrial composite index of employment (1949=100) rose seasonally from March to April. The latest index, at 116.7, was 1.3 p.c. above March. Employment in most industrial divisions increased over the month, the exceptions being forestry and mining which declined, and finance, insurance and real estate which showed no general change.

Seasonally adjusted, the industrial composite was virtually unchanged at 120.6, the movements of the seasonally adjusted industry indexes being largely offsetting. The only significant changes in the major industry divisions were increases in forestry, trade and durable goods manufacturing and a decline in construction. The change recorded in forestry may reflect changing seasonal patterns. Employment in durable goods manufacturing rose, mainly as a result of the settlement of industrial disputes in the transportation equipment group.

Per capita earnings declined by 20 cents over the month to \$80.21. Lower earnings in the construction industry, where a number of employees took an unpaid holiday on Easter Monday, were a factor in the decline. The payroll index at 219.8 was 1.1 p.c. above March, and 6.5 p.c. higher than in April 1961.

EMPLOYMENT

Manufacturing

The seasonally adjusted employment index for manufacturing rose slightly over the month to 112.1. The adjusted index has risen slowly in 1962 after advancing fairly rapidly in the last half of 1961. The slow-down has been most pronounced in the non-durables component, which has been virtually unchanged since January 1962. Employment in durables continued to improve despite industrial disputes of some magnitude in the motor vehicles industry during February and March.

All components of durable goods manufacturing increased from March to April, except wood products. The increases in transportation equipment, electrical apparatus and supplies and non-metallic mineral products were larger than seasonal; for these industries, this marked a continuation of trends in evidence during the past year. The gains in iron and steel and non-ferrous metal products were only slightly greater than seasonal. Wood products declined more than is usual for the time of year.

In iron and steel products, employment in primary iron and steel and iron castings continued to strengthen. The situation in agricultural implements remained unsettled. Fabricated and structural steel declined contra-seasonally over the month; machinery and sheet metal products rose less than seasonally. The weakening in these three industries arrested strong upward trends in evidence for a number of months.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

The large rise in transportation equipment reflected the settlement of industrial disputes in the motor vehicles group, although larger-than-seasonal increases were also recorded in motor vehicle parts and accessories. Aircraft and parts declined for the third successive month. It is not entirely clear whether this drop reflects a newly-emerging seasonal pattern or is symptomatic of general business conditions in the industry. The remaining components of transportation equipment rose less than seasonally.

The seasonally-adjusted non-durable goods manufacturing index declined slightly in April. The main factor in the decrease was a smaller-than-usual rise in food and beverages. The changes in the remaining industry groups did not differ materially from seasonal patterns. However, larger-than-seasonal increases in rubber and leather products continued the upward movement of recent months.

#### Non-manufacturing Industries

In recent years the spring decline in logging has been increasingly concentrated in March instead of extending to April suggesting a change in the seasonal pattern. It is difficult to make a meaningful statement about employment conditions in mining, largely because of the erratic movement of the coal component. From March to April, the adjusted index for this division rose mainly because of the recall of coal miners in Nova Scotia, temporarily laid off in January. Construction fell sharply over the month to levels prevailing before the large rise recorded in March, which now appears to have been of temporary significance, a result of a large though short-lived advance in the building component.

In the service-producing industries the only significant change was in trade, in which larger-than-usual increases in retail stores raised the adjusted division index. Transportation, storage and communication fell slightly, continuing the steadily downward movement in evidence since November 1960. The remaining industrial divisions recorded little change.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers  
Canada, by Industrial Division

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

\* UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported
		Apr. 1962	Mar. 1962	Apr. 1961	Apr. 1960	Apr. 1962	Mar. 1962	Apr. 1961	Apr. 1960	
	%	1949=100				dollars				number
Forestry (chiefly logging) .....	76	35.7	47.1	34.0	41.0	90.12	83.93	87.60	84.95	26,129
Mining .....	96	113.3	114.3	111.8	113.4	98.15	99.19	95.16	94.22	100,389
Metal mining .....		130.1	129.1	130.3	136.6	99.49	98.97	96.35	95.64	61,503
Gold (a) .....		63.4	68.2	70.7	72.6	81.41	81.58	77.56	75.33	15,577
Other metal (b) .....		187.4	185.6	185.9	196.3	105.63	104.91	103.01	102.64	45,926
Iron .....		251.7	241.7	243.9	266.2	115.18	115.95	111.64	103.39	8,398
Uranium .....		..	..	..	..	115.69	116.95	112.18	111.23	4,789
Fuels .....		80.1	86.0	76.5	74.2	101.22	104.88	96.54	95.99	24,658
Coal .....		37.9	34.1	37.5	32.5	74.50	75.75	71.35	69.97	9,375
Oil and natural gas .....		252.1	297.7	244.7	253.6	117.61	118.51	113.14	110.35	15,283
Non-metal (c) .....		135.6	130.7	131.0	123.4	86.99	89.14	87.46	84.02	14,223
Asbestos .....		181.6	181.6	178.7	171.0	96.96	97.98	98.49	92.52	6,835
Manufacturing .....	92	110.3	109.6	105.4	103.9	83.14	83.22	80.95	78.40	1,195,220
Durable goods (u) .....		114.7	113.3	107.5	114.6	89.59	89.62	86.90	84.27	566,247
Non-durable goods (u) .....		106.7	106.5	103.6	104.1	77.34	77.52	75.77	72.94	623,973
Food and beverages .....		107.7	105.1	104.5	107.3	74.02	74.01	72.72	70.38	150,970
Meat products .....		129.6	127.7	128.7	132.7	82.73	82.69	80.97	78.54	29,378
Dairy products .....		122.3	118.2	122.0	122.0	69.27	69.03	67.64	65.33	14,975
Canned and cured fish .....		94.2	82.6	83.0	94.3	53.33	52.35	52.19	49.81	10,763
Canned and preserved fruits and vegetables .....		82.8	78.4	71.1	78.3	68.01	68.17	68.55	65.08	11,598
Grain mill products .....		97.5	93.2	93.9	102.5	79.59	79.59	78.37	75.27	9,140
Bread and other bakery products .....		109.6	108.6	107.6	110.5	68.47	67.85	66.59	66.09	22,531
Biscuits and crackers .....		91.2	90.9	91.8	88.0	63.63	64.92	59.57	58.34	6,737
Distilled and malt liquors .....		94.2	92.4	97.0	99.0	100.24	100.65	96.09	93.04	13,170
Other beverages (d) .....		144.5	139.8	140.0	137.8	74.87	73.53	72.27	70.85	10,389
Confectionery .....		81.9	83.4	79.8	82.2	59.41	59.12	59.94	57.81	7,949
Tobacco and tobacco products .....		99.7	109.7	77.9	77.7	74.99	73.33	80.87	77.71	10,148
Rubber products .....		102.3	101.6	96.0	103.7	84.44	85.91	82.27	79.95	20,321
Leather products .....		83.6	89.9	85.6	81.1	54.70	56.50	53.89	50.48	29,392
Boots and shoes (except rubber) .....		96.0	97.3	91.9	87.7	52.11	54.32	50.95	47.48	20,489
Other leather products (f) .....		75.2	76.5	74.6	69.6	60.68	61.50	60.24	57.10	8,903
Textile products (except clothing) .....		77.8	77.3	76.7	76.8	65.54	66.44	64.14	62.26	58,288
Cotton yarn and broad woven goods .....		74.2	75.1	69.3	68.6	61.73	63.79	60.81	59.18	18,249
Woollen goods .....		59.7	53.7	59.5	60.5	61.41	62.43	60.43	57.88	9,008
Synthetic textiles and silk (t) .....		77.2	78.5	81.8	83.4	72.60	72.89	70.11	68.62	13,202
Clothing (textile and fur) .....		91.4	94.0	89.1	88.7	51.69	52.92	50.25	43.55	99,208
Men's clothing .....		94.0	95.9	90.2	89.1	50.34	51.79	49.01	47.20	33,286
Women's clothing .....		99.6	104.4	98.5	96.1	53.76	54.39	52.25	50.36	27,389
Knit goods .....		71.2	73.8	69.4	71.1	51.02	51.51	49.70	47.92	18,275
Fur goods .....		64.1	62.5	64.5	64.3	75.52	82.70	71.62	66.01	2,995
Wood products .....		101.5	102.3	97.2	100.7	70.36	71.53	70.33	67.72	94,871
Saw and planing mills (g) .....		101.7	104.1	97.4	101.0	72.33	74.03	73.56	70.34	59,654
Furniture .....		112.6	111.7	105.9	109.2	68.54	68.56	66.09	64.48	25,968
Other wood products (h) .....		78.6	78.9	79.1	83.5	62.72	63.78	61.98	60.79	9,249
Paper products .....		122.2	120.9	120.9	120.8	96.34	96.76	96.23	89.92	91,782
Pulp and paper mills .....		121.8	120.4	121.9	121.1	103.78	104.36	104.45	96.75	64,285
Other paper products (i) .....		123.2	122.2	118.7	120.0	78.93	79.06	76.45	73.47	27,497
Printing, publishing and allied industries .....		126.0	126.2	123.2	124.1	90.87	90.73	87.14	85.11	61,685
Iron and steel products .....		106.2	105.0	101.9	103.9	94.35	93.50	91.50	88.35	173,140
Agricultural implements .....		63.3	64.0	69.9	79.2	98.10	96.85	93.02	88.76	11,159
Boilers and plate work .....		112.9	109.5	103.6	114.3	93.02	93.75	88.86	86.21	7,127
Fabricated and structural steel .....		148.1	146.9	142.0	151.4	95.09	95.50	92.72	89.71	11,108
Hardware and tools .....		104.5	104.7	98.3	102.4	82.89	83.52	82.03	79.29	12,005
Heating and cooking appliances .....		99.4	98.4	92.1	97.5	80.06	80.99	77.62	75.30	8,520
Iron fastenings .....		93.2	91.6	87.3	93.7	90.07	91.10	86.67	84.41	18,451
Machinery (j) .....		108.1	107.7	103.2	107.8	90.20	90.76	87.37	84.78	34,032
Industrial machinery (r) .....		122.3	122.1	113.0	119.4	90.78	91.28	88.23	85.38	26,519
Primary iron and steel .....		121.3	119.2	115.4	125.4	108.57	108.07	105.30	100.80	36,352
Sheet metal products .....		109.2	106.5	103.6	106.6	92.31	92.51	89.97	86.35	17,089
Wire and wire products .....		109.6	108.9	108.4	113.8	93.61	93.50	92.09	89.04	9,046

## INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, roulemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

Dominion Bureau of Statistics

EMPLOYMENT SECTION

OTTAWA

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

Volume 40, No. 5

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
MAY, 1962

Summary

The industrial composite index of employment (1949=100) rose by 3.7 p.c. to 121.0 in May, as staffs were increased in most major industrial divisions with the oncoming of spring. Seasonally adjusted the industrial composite index showed a moderate rise of 0.3 p.c. to 121.0 largely as a result of a greater than seasonal increase in manufacturing.

The seasonally-adjusted indexes for a majority of the major industrial divisions were up from April. The most important increase was in manufacturing, where both major components recorded significant gains. In durables, there were marked advances in iron and steel, electrical apparatus and supplies and transportation equipment. The increase in the last-named industry reflected a contra-seasonal rise in shipbuilding, which more than offset losses in the aircraft and parts industry. The settlement of a major industrial dispute in the textile industry accounted for a large part of the rise in non-durables. The only decline of importance occurred in construction. In that industry, a larger than seasonal increase in building was outweighed by a smaller than average rise in the highway, bridge and street component.

The industrial composite of average weekly wages and salaries rose by 55 cents to \$80.76 in May. The latest figure was \$2.76 above the same month last year. Most major industrial divisions showed increases over the month with declines being recorded in forestry, public utility operation and service. In no case, however, did the changes differ significantly from seasonal patterns. The payroll index at 229.4 was 4.4 p.c. above April 1962 and 6.9 p.c. above May 1961.

Employment Review, January to May, 1962

The industrial composite index of employment tended to rise less rapidly in the first part of 1962 than over the last half of 1961. The increase in the seasonally-adjusted index over the first 5 months of 1962 amounted to 0.5 p.c., an average rate of 0.1 p.c. per month. On the other hand, from March 1961 to January 1962 the composite rose by 3.6 p.c., an average monthly increase of 0.4 p.c. The recent flattening reflected generally sluggish movement in the goods producing industry divisions, particularly in non-durables where employment levelled in 1962 after a marked advance from March to December 1961. However, declines in forestry and construction also affected overall trends. Durable goods manufacturing and mining increased from January to May, although the durables index rose at a slower rate than that recorded in the last half of 1961. The increase in mining resulted from the re-employment of miners temporarily laid off in January. In the service-producing industries, trade, service and finance, insurance and real estate advanced steadily over the period but transportation, storage and communication continued sluggish while public utility operation declined.

Manufacturing

Major industrial disputes contributed importantly to the levelling in manufacturing in the first quarter of 1962. With the settlement of these disputes in March the index rose significantly. Nevertheless, the January to May increase of 1.1 p.c. was much smaller than the 2.2 p.c. recorded between September and January.

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

For footnotes (a) to (w) see page iii.

Except for a brief period between December 1961 and March 1962 the adjusted durables index has advanced strongly from its low of March 1961. The May 1962 index, at 116.2 was 7.1 p.c. above the March 1961 low. During the past year, all major industry groups showed improvement with marked gains being recorded in electrical apparatus and supplies and non-metallic mineral products. The overall performance of the wood products industry in 1961 was good, if somewhat erratic. In the first 5 months of 1962, however, employment firmed at about levels prevailing during the cyclical high of 1959. Employment in non-ferrous metal products levelled in 1962 after showing moderate gains in 1961.

Iron and steel products and transportation equipment showed marked increases over the whole period (March 1961 to May 1962) although the progress of transportation equipment was somewhat erratic. Employment in iron and steel products tended to level in the second half of 1961, reflecting uncertainty in the agricultural implements industry and reduced staffs in primary iron and steel and iron castings. In the first 5 months of 1962, however, employment in iron and steel made a strong upsurge as significant gains in iron castings, primary iron and steel, sheet metal and machinery products were recorded. Transportation equipment has shown little overall improvement in 1962. The strong upward trend noted in the last half of 1961 was interrupted in the early months of 1962 as a result of a major industrial dispute in the motor vehicle component and because of weakening in railroad and rolling stock and aircraft and parts. However, the industry group advanced from March to May as a settlement was affected in motor vehicles early in April and shipbuilding recorded larger than usual gains in May.

In the first ten months of the recent recovery the seasonally-adjusted non-durable goods manufacturing index showed unusual strength. In comparable periods in earlier cycles this division has shown small variation, but between March 1961 and January 1962 it rose by 3.2 p.c. During the latest expansion, particular strength has been forthcoming from the apparel industries with strong assists from rubber products and printing, publishing and allied industries. The index flattened in 1962, however, reflecting in part a major industrial dispute in textile products.

#### Non-Manufacturing Industries

The movement of the seasonally-adjusted indexes for the remaining goods-producing industrial divisions has been spotty. After marked increases from March to July 1961, the forestry index fluctuated at about 74.0 until January 1962 when it stood at 74.6. It then fell sharply from January to March and rose again to 66.5 by May, almost 11 p.c. below its January level. The mining industry has been beset by the erratic behaviour of the coal component. Large periodic layoffs in the Atlantic Region have accounted for most of the irregularity in the series. Construction recorded large, if uneven gains from March to December 1961. In 1962, however, the index has tended to decline.

In the service-producing industries, trade, and finance, insurance and real estate have advanced steadily. Trade moved slowly over the first three quarters of 1961 but has shown a quickened pace since that time. Public utility operation rose fairly rapidly during the last half of 1961 but recorded an overall decline between January and May 1962. Transportation, storage and communication has continued virtually unchanged since early 1961.

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS, MAY, 1962

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

Important  
Instructions on other side

1. If you had any employees drawing pay in last pay period(s) in above month, please fill in this form. If not, when will you operate? .....

2. Employees drawing pay in last pay period(s) in month, and their gross payroll to nearest dollar.

A. Salaried employees - No. .... B. Wage-earners - No. .... C. Total employees - No. ....

Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payrolls - \$ .....

3. Payroll detail for totals in Question 2C.

(Report only for last pay period(s) in month.)

3. Payroll detail for totals in Question 2C. (Report only for last pay period(s) in month.)	Dates of pay period(s)		Employees receiving pay	Gross earnings in pay period(s) (omit cents)	Office use
	From	To			
REGULAR EMPLOYEES—full and part time:					
A. Paid monthly .....				\$ .....	
B. Paid half-monthly—second half only .....					
C. Paid fortnightly—last two weeks only .....					
D. Paid weekly—last week in month only .....					
E. Other period (specify) .....					
CASUAL WORKERS, employed for part of last week in month, paid by:					
F. Day: Man-days: No. ....					
G. Hour: Man-hours: No. ....					
OTHER PAYMENTS—state type:					
H. ....					
I. ....					
J. ....					
TOTALS (to agree with 2C) .....					

4. Female Employees: Number

A. Women on salary .....

B. Women wage-earners .....

C. Total women .....

Change name or address if necessary.

Request file copies, if required.

Signature ..... Date .....  
9-ES1a - Monthly Employment Report .....  
Required under the Statistics Act of Canada, Chap. 257, R.S.C. 1952

5. Report for male and female wage-earners whose hours are recorded.

A. Pay period from ..... to .....  
B. No. of days establishment operated in this pay period .....

C. Wage-earners whose hours are recorded:  
No. .... Office use

D. Hours worked and hours of paid absence:  
No. ....

E. Gross wages paid for these hours: (omit cents)  
\$ .....

6. Number of days and hours in standard work week of your establishment for:

A. Wage-earners: Days ..... Hours .....

B. Salaried staff: Days ..... Hours .....

7. If a public holiday was observed in reported pay period(s), state numbers of employees absent:

With pay ..... Without pay .....

8. Please explain big differences from last report in employees, pay, hours, etc.

.....  
.....  
.....  
.....  
.....  
.....

**MAY**

**O. H. M. S.**

NO POSTAGE  
REQUIRED

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**EMPLOYMENT SECTION**

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**JUNE 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

June, 1962  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 6

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
JUNE, 1962.

---

Summary

The industrial composite index of employment (1949=100) increased seasonally from May to June. The June index at 124.8 was 2.9 p.c. above May; manufacturing and forestry accounted for over three-fourths of the overall gain.

The seasonally-adjusted indexes for most major industrial divisions showed small increases. However, these were offset by declines in construction and in transportation, storage and communication. In the latter division, industrial disputes in the trucking industry accounted for the marked decline.

In manufacturing, the seasonally-adjusted indexes for both major components showed small increases. All industry groups in the durables division recorded larger-than-seasonal gains except transportation equipment, which declined contra-seasonally. In non-durables, most industries increased a little more than seasonally but the only substantial gains occurred in textile and paper products.

The industrial composite of average weekly wages and salaries rose by 25 cents over the month to \$81.04. Most major industrial divisions showed improvement with the largest increase occurring in construction. Service, public utility operation and finance, insurance and real estate recorded small declines.

The payroll index rose by 3.2 p.c. to 237.5 in June. This was 6.2 p.c. above the figure for June 1961.

Employment

Manufacturing

The seasonally-adjusted manufacturing index rose by 0.2 p.c. to 113.5 in June. The latest index was 6.1 p.c. above the March 1961 low. The division has now fully recovered the losses of the 1960-1961 recession, the June index being more than 1 p.c. above the October 1959 peak of 112.0.

In durable goods manufacturing all major components recorded larger-than-seasonal increases over the month with the exception of transportation equipment which declined contra-seasonally. The gains in iron and steel products resulted mainly from marked advances in primary iron and steel, iron castings and sheet metal products. These gains were offset to some extent by industrial disputes in machinery products and declines, larger than usual, in agricultural implements.

Employment in electrical apparatus and supplies and non-metallic mineral products continued upward with the May to June increase in the former industry group being particularly impressive. Wood products recorded larger-than seasonal increases for the second successive month, reversing the downward movement apparent in the first quarter. Non-ferrous metals rose seasonally.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The decline in transportation equipment reflected decreases in most component industries. Aircraft and parts showed a large reduction continuing the downward trend in evidence for the past six months. An early completion of the 1962 production schedules was a factor in the above average decline in motor parts and accessories. An additional factor was a shortage of orders as a result of industrial disputes in the United States. Employment rose in railroad and rolling stock and in shipbuilding and repairs, but the increase in the former was much less than seasonal.

The seasonally-adjusted index for non-durable goods manufacturing rose to 110.6 in June. It has resumed its upward movement after flattening from January to April. All component industries recorded increases over the month except tobacco products which declined contra-seasonally. In most cases the changes did not differ importantly from seasonal patterns. Only textile and paper products showed gains significantly larger than seasonal.

#### Non-manufacturing Industries

The movements of the non-manufacturing industry divisions were largely offsetting. The seasonally-adjusted indexes for forestry, mining, trade, and finance, insurance and real estate rose while those for the remaining non-manufacturing divisions declined. The small increase in mining reflected mainly a larger-than-usual increase in non-metal mining.

The only declines of importance occurred in construction and transportation storage and communication. The decline in the adjusted construction index reflected weakening in the highway, bridge and street component. Industrial disputes in the trucking industry were the main factor in the decline in transportation.

#### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 25 cents over the month. Most of this increase was accounted for by the construction division where employment rose by over 7 p.c. and average earnings rose by \$1.77. Per-capita earnings in manufacturing were unchanged.

All provinces showed increases over May in per-capita earnings with the exception of Prince Edward Island. The most important rise was in the Prairie Provinces where increases of about \$1.00 were reported.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers  
Canada, by Industrial Division

Year and Month	Forestry (chiefly logging)		Mining	Manufacturing						Construction

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

\* UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949=100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported June 1962
		June 1962	May 1962	June 1961	June 1960	June 1962	May 1962	June 1961	June 1960	
	%	1949 = 100				dollars				number
Forestry (chiefly logging) .....	76	74.2	51.9	76.6	89.1	79.22	73.82	74.52	74.20	54,298
Mining .....	96	121.0	117.8	119.7	122.1	98.70	98.59	95.49	94.13	107,152
Metal mining .....		135.1	133.0	135.2	140.3	100.26	100.22	98.18	97.11	63,883
Gold (a) .....		70.7	69.5	72.8	75.4	80.72	82.63	78.53	77.35	16,090
Other metal (b) .....		195.0	192.0	193.4	200.9	106.34	106.14	105.07	104.02	47,793
Iron .....		277.7	268.5	255.0	281.1	119.67	116.97	117.03	116.85	9,268
Uranium .....		..	..	..	..	114.21	113.86	119.32	115.33	4,785
Fuels .....		85.3	84.5	84.0	86.1	104.64	101.94	97.15	94.75	26,264
Coal .....		40.8	41.9	40.6	43.9	79.72	77.52	73.32	71.92	10,093
Oil and natural gas .....		267.2	258.3	270.9	267.9	120.20	118.09	112.51	110.87	16,171
Non-metal (c) .....		162.1	147.2	153.3	144.3	83.63	86.30	82.16	79.92	17,005
Asbestos .....		194.2	186.7	185.6	181.7	95.62	96.04	94.00	91.93	7,306
Manufacturing .....	92	116.2	113.7	111.2	112.2	83.72	83.72	81.16	78.23	1,258,760
Durable goods (u) .....		120.7	118.4	113.7	116.9	90.22	90.38	87.42	83.79	596,325
Non-durable goods (u) .....		112.3	109.7	109.1	108.3	77.87	77.70	75.70	73.18	662,435
Food and beverages .....		122.3	115.5	119.0	119.1	73.39	74.15	72.25	69.90	171,395
Meat products .....		136.0	132.4	137.5	140.1	84.66	85.10	84.25	79.92	30,827
Dairy products .....		135.8	130.0	135.6	136.0	69.35	69.53	68.90	64.93	16,631
Canned and cured fish .....		164.5	144.7	161.2	144.6	47.49	48.54	43.61	47.43	13,735
Canned and preserved fruits and vegetables .....		114.7	94.4	96.1	104.0	62.93	66.36	64.07	57.82	16,066
Grain mill products .....		102.5	100.1	102.8	104.9	81.79	82.40	79.43	77.80	9,612
Bread and other bakery products .....		113.9	111.4	113.1	113.2	71.53	70.82	69.25	68.49	23,429
Biscuits and crackers .....		100.3	95.2	97.8	94.2	63.47	64.28	63.01	59.91	7,414
Distilled and malt liquors .....		100.5	95.3	102.6	105.9	103.42	102.58	98.56	94.38	14,062
Other beverages (d) .....		165.1	156.8	156.3	155.5	76.81	77.42	72.46	71.90	11,869
Confectionery .....		83.0	81.5	76.0	84.0	59.89	60.08	60.30	57.39	8,053
Tobacco and tobacco products .....		83.9	99.4	81.9	79.5	86.01	77.60	82.36	79.45	8,540
Rubber products .....		107.9	105.4	100.3	102.0	87.07	85.88	84.00	79.69	21,430
Leather products .....		89.0	87.4	87.2	82.7	55.66	54.58	54.27	51.57	29,547
Boots and shoes (except rubber) .....		96.7	94.1	94.6	90.2	53.44	51.87	51.62	48.82	20,651
Other leather products (f) .....		75.2	75.1	74.4	69.5	60.81	60.68	60.19	57.78	8,896
Textile products (except clothing) .....		82.2	81.0	78.5	77.8	66.51	66.44	64.40	61.90	61,520
Cotton yarn and broad woven goods .....		73.6	73.4	70.6	69.4	62.98	62.51	61.62	57.43	18,093
Woolen goods .....		63.2	61.4	62.6	63.0	62.94	62.75	61.12	59.25	9,537
Synthetic textiles and silk (t) .....		91.0	88.9	84.1	84.2	72.60	73.41	70.02	68.71	15,568
Clothing (textile and fur) .....		92.2	91.1	89.5	88.4	51.27	51.03	49.86	47.00	100,345
Men's clothing .....		96.0	94.7	91.6	90.7	50.26	49.32	48.32	46.23	33,981
Women's clothing .....		95.9	96.6	96.2	91.4	51.47	52.31	50.70	46.39	26,369
Knit goods .....		74.8	73.1	70.3	70.6	51.59	50.67	50.03	47.06	19,343
Fur goods .....		64.3	65.6	65.3	67.0	76.46	75.61	72.42	70.07	3,009
Wood products .....		113.1	108.1	109.3	109.9	71.36	70.75	69.35	66.84	106,486
Saw and planing mills (g) .....		116.8	110.8	114.7	113.0	73.29	72.56	71.78	69.21	69,230
Furniture .....		117.5	114.3	109.7	111.8	69.24	69.13	67.66	63.61	27,096
Other wood products (h) .....		86.4	82.8	82.5	91.5	63.36	62.95	62.37	60.52	10,160
Paper products .....		129.2	125.1	127.3	127.1	98.78	97.28	94.91	91.86	96,986
Pulp and paper mills .....		129.1	124.8	128.7	129.0	106.74	104.94	102.16	98.84	68,342
Other paper products (i) .....		129.4	125.9	124.0	122.7	79.80	79.10	77.29	74.51	28,644
Printing, publishing and allied industries .....		127.2	126.7	124.5	125.3	90.99	91.46	87.63	85.00	62,279
Iron and steel products .....		111.5	109.7	105.4	108.5	95.67	95.92	92.46	88.53	181,495
Agricultural implements .....		59.2	62.6	67.9	71.9	99.09	98.31	93.64	90.69	10,416
Boilers and plate work .....		122.5	118.3	114.0	119.0	94.21	94.85	89.79	87.16	7,728
Fabricated and structural steel .....		163.0	157.0	149.5	169.8	99.46	96.86	93.79	89.16	12,223
Hardware and tools .....		109.2	106.9	100.4	99.4	84.08	84.17	82.15	82.16	12,470
Heating and cooking appliances .....		105.4	102.5	97.5	97.3	81.94	80.34	79.17	76.98	9,038
Iron castings .....		97.4	94.6	91.4	91.9	91.06	90.12	88.17	83.56	19,168
Machinery (j) .....		111.0	111.5	105.1	108.3	90.86	90.18	87.76	84.43	35,029
Industrial machinery (r) .....		125.0	126.7	115.2	119.5	91.37	90.83	88.42	85.14	27,175
Primary iron and steel .....		128.0	125.7	120.5	120.0	108.70	112.84	106.03	98.89	38,358
Sheet metal products .....		121.9	115.5	109.7	112.7	95.04	93.62	91.95	89.75	19,042
Wire and wire products .....		113.0	112.7	111.5	118.9	94.72	95.50	94.22	89.97	9,327

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, roulemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**JULY 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

October 1962  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 7

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year**

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year**

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year**

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year**

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 — Review of Employment and Payrolls—Annual—Price \$1.00**

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents**

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents**

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents**

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 — Labour Income, 1926-58 — Price 75 cents**

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
JULY, 1962

Summary

The industrial composite index of employment (1949=100) rose by 0.6 p.c. over the month to 125.7 in July. Increases were recorded in all major industrial divisions except trade and manufacturing. The decline in trade followed seasonal patterns.

Seasonally adjusted, the composite advanced from 121.4 in June to 121.8 in July. The employment situation strengthened slightly in most industrial divisions but the major part of the gain resulted from a large rise in transportation, storage and communication. The increase in that division reflected settlement of a major industrial dispute in the trucking industry.

Manufacturing was virtually unchanged as moderate gains in durables were largely offset by a decline in non-durables. A smaller rise than usual in food and beverages brought about the decline in the seasonally-adjusted non-durable figure.

The seasonally-adjusted indexes for forestry and construction declined over the month. The decrease in construction marked continuation of a trend apparent since March 1962.

The industrial composite of average weekly wages and salaries decreased by 17 cents to \$80.38 in July. A reduction of 61 cents in manufacturing contributed to the overall decline, with most divisions recording little or no change.

The payroll index rose by 0.3 p.c. over the month to 238.3, the latest index was 6.1 p.c. above the figure for July 1961.

Employment

Manufacturing

The seasonally-adjusted manufacturing index, at 113.7, was only slightly higher than the June figure. The adjusted durables index rose by 0.5 p.c. but most of the rise was offset by a decline of 0.3 p.c. in non-durables.

Most industry groups in the durables sector showed some improvement. Wood products rose more than seasonally. Employment in iron and steel was steady although this group usually reports a moderate decrease in July. The decline in electrical apparatus and supplies was less than seasonal. The large drop in transportation equipment and the small increases in non-ferrous metal and non-metallic mineral products conformed roughly to seasonal patterns.

In transportation equipment all components declined. The fall in motor vehicles and motor parts and accessories accounted for nearly all the overall decrease. The reductions in the automobile industries were largely seasonal, reflecting annual closings for model change-over and inventory taking. The losses in aircraft and parts and in shipbuilding and repairs were less than seasonal.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

In non-durables, employment decreased in all industry groups except food and beverages, leather, petroleum, and paper products. The rise in food and beverages was less than seasonal and was an important factor in the decline of the adjusted non-durables index. The increase in petroleum products was contra-seasonal while that in paper products was about average for the time of year. The decline in textile and clothing products was somewhat less than seasonal; however the decreases in the remaining industry groups followed normal seasonal patterns.

#### Non-Manufacturing Industries

The seasonally-adjusted indexes for most non-manufacturing industrial divisions advanced from June to July. The largest increase was reported in transportation, storage and communication where employment conditions reflected settlement of a major industrial dispute in trucking. A large rise was also recorded in public utility operation with employment in the industry increasing more than seasonally in every region except British Columbia. Finance, insurance and real estate rose slightly. In mining, a substantial improvement in the metals group was largely offset by a contra-seasonal decline in fuels.

The adjusted indexes for forestry and construction decreased from June to July. Industrial disputes in the building industry intensified the decline in construction that has been in evidence in recent months.

#### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries fell by 17 cents from June to \$30.38 in July as per-capita earnings in manufacturing declined by 61 cents. There were decreases in both major components of manufacturing. The decrease in durables reflected the annual closing of automobile plants for inventory-taking and model change-over. Seasonal increases in numbers of unskilled workers in food and beverages resulted in a decline in average weekly wages and salaries in non-durable goods manufacturing.

Average weekly wages and salaries declined over the month in four of the five regions. There was a rise of 22 cents in the Atlantic Region. The decrease in the other regions were small, the largest being a reduction of 42 cents in Quebec.

Table 2.- Seasonally-Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, by Industrial Division

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949 = 100

\*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949 = 100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported
		July 1962	June 1962	July 1961	July 1960	July 1962	June 1962	July 1961	July 1960	
	%	1949 = 100				dollars				number
Forestry (chiefly logging) .....	76	78.7	75.0	82.9	93.2	81.59	79.30	73.26	72.82	57,599
Mining .....	96	122.5	121.0	121.0	123.3	98.86	98.79	94.23	92.58	108,452
Metal mining .....		138.7	135.1	136.2	139.7	100.40	100.32	96.01	94.21	65,582
Gold (a) .....		70.8	70.7	73.2	74.5	80.71	80.72	76.64	74.43	16,124
Other metal (b) .....		201.8	195.0	195.0	200.6	106.82	106.92	102.79	101.05	49,458
Iron .....		321.3	277.7	256.9	234.0	119.69	119.67	116.67	112.14	10,723
Uranium .....		..	..	..	..	114.04	114.21	110.93	107.40	4,705
Fuels .....		84.2	85.3	84.7	91.6	104.27	104.37	97.19	94.46	25,907
Coal .....		39.7	40.8	42.0	49.3	80.43	79.72	74.05	72.72	9,824
Oil and natural gas .....		265.8	266.9	268.4	273.3	118.83	120.59	112.77	111.32	16,083
Non-metal (c) .....		161.8	162.1	158.1	141.5	84.60	83.62	83.00	81.73	16,963
Asbestos .....		195.1	194.2	185.1	177.3	95.33	95.62	95.65	93.00	7,341
Manufacturing .....	92	115.3	116.4	110.9	110.2	83.11	83.72	80.34	78.18	1,249,071
Durable goods (u) .....		118.1	121.0	111.6	111.9	89.51	90.20	86.68	83.72	583,623
Non-durable goods (u) .....		112.9	112.5	110.4	108.8	77.50	77.88	74.96	73.39	665,448
Food and beverages .....		125.9	122.8	125.7	123.5	72.19	73.34	70.38	69.38	176,522
Meat products .....		137.7	136.5	140.0	142.8	83.06	84.72	80.61	78.91	31,207
Dairy products .....		136.0	135.9	137.6	136.1	69.15	69.99	67.73	65.23	16,646
Canned and cured fish .....		176.9	168.0	169.5	149.3	53.95	47.61	50.99	52.29	20,201
Canned and preserved fruits and vegetables .....		147.8	115.7	152.3	144.2	56.64	62.51	55.64	56.26	20,699
Grain mill products .....		100.5	102.2	104.0	104.8	82.49	81.82	79.51	76.09	9,502
Bread and other bakery products .....		112.6	113.7	112.9	114.1	70.78	71.52	68.17	66.50	23,147
Biscuits and crackers .....		99.3	103.2	94.9	91.6	63.84	63.17	62.19	59.06	7,341
Distilled and malt liquors .....		100.3	100.5	101.3	103.3	101.52	103.81	100.14	95.73	14,033
Other beverages (d) .....		163.2	165.1	158.8	157.2	73.36	76.73	74.75	72.48	11,731
Confectionery .....		80.9	82.3	73.8	81.5	59.70	60.09	60.21	59.15	7,848
Tobacco and tobacco products .....		81.7	83.9	81.5	78.6	86.55	86.01	82.88	81.35	8,316
Rubber products .....		105.5	108.2	99.6	98.8	85.76	87.55	82.63	80.11	20,946
Leather products .....		89.1	88.8	87.8	83.1	55.50	55.62	54.04	52.26	29,550
Boots and shoes (except rubber) .....		97.1	96.5	95.1	91.2	54.13	53.50	52.00	50.25	20,739
Other leather products (f) .....		74.5	74.8	75.2	69.1	53.72	60.56	58.56	56.91	8,811
Textile products (except clothing) .....		81.6	82.3	77.8	76.5	65.72	66.52	63.49	61.79	61,092
Cotton yarn and broad woven goods .....		71.9	73.6	70.8	68.3	61.04	62.98	59.21	56.87	17,676
Woollen goods .....		63.1	63.6	62.3	62.9	62.38	62.82	60.52	59.34	9,512
Synthetic textiles and silk (t) .....		91.5	91.1	84.0	83.5	72.07	72.70	70.34	68.87	15,650
Clothing (textile and fur) .....		91.5	92.3	88.5	87.4	51.61	51.15	50.15	48.43	99,358
Men's clothing .....		94.4	96.5	88.4	88.4	49.95	50.19	48.42	46.49	33,259
Women's clothing .....		97.0	95.6	96.6	93.0	53.73	51.25	52.05	50.31	26,666
Knit goods .....		73.9	74.6	70.1	69.2	50.21	51.50	49.99	48.11	19,096
Fur goods .....		65.0	64.4	64.2	66.6	76.53	75.95	73.48	69.91	3,041
Wood products .....		114.5	113.3	111.0	109.2	71.07	71.36	69.33	67.34	107,931
Saw and planing mills (g) .....		119.2	117.2	117.4	112.6	72.67	73.30	71.07	69.10	70,817
Furniture .....		116.9	117.0	109.8	111.0	69.97	69.20	67.75	65.59	26,937
Other wood products (h) .....		86.5	86.5	82.4	89.7	62.81	63.87	61.34	61.00	10,177
Paper products .....		130.0	129.2	128.0	128.2	98.63	98.70	94.68	92.93	97,646
Pulp and paper mills .....		131.0	129.1	129.9	131.0	106.05	106.66	101.78	100.26	69,374
Other paper products (i) .....		127.7	129.5	123.5	121.4	80.40	79.71	77.13	74.27	28,272
Printing, publishing and allied industries .....		126.0	127.3	123.7	123.2	90.77	90.93	87.67	84.76	61,679
Iron and steel products .....		111.8	111.8	105.2	107.0	95.81	95.68	92.39	88.79	181,970
Agricultural implements .....		59.2	59.2	64.2	67.3	100.90	99.09	91.75	91.46	10,414
Boilers and plate work .....		122.8	122.5	115.4	115.2	93.71	94.20	90.70	88.02	7,746
Fabricated and structural steel .....		165.3	164.2	150.8	168.0	96.32	99.52	91.68	89.39	12,356
Hardware and tools .....		109.1	109.9	99.7	97.9	82.95	84.06	81.86	79.54	12,455
Heating and cooking appliances .....		108.2	107.9	97.8	97.8	82.66	82.28	79.23	76.24	9,261
Iron castings .....		97.4	97.6	90.6	89.0	90.75	90.98	88.34	83.69	19,172
Machinery (j) .....		110.8	111.3	105.5	107.0	91.33	90.90	87.51	85.16	34,959
Industrial machinery (r) .....		124.9	125.5	116.5	117.9	92.05	91.41	88.02	85.70	27,164
Primary iron and steel .....		129.2	128.0	122.2	121.4	108.79	108.69	106.49	99.91	38,706

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS, JULY, 1962

Important  
Instructions on other side

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

1. If you had any employees drawing pay in last pay period(s) in above month please fill in this form. If not when will you operate? .....

2. Employees drawing pay in last pay period(s) in month and their gross payroll to nearest dollar.

A. Salaried employees - No. .... B. Wage-earners - No. .... C. Total employees - No. ....  
Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payroll - \$ .....

3. Payroll detail for totals in Question 2C.  
(Report only for last pay period(s) in month.)

	Dates of pay period(s)		Employees receiving pay	Gross earnings in pay period(s) (omit cents)	Office use
	From	To			
3.3. Payroll detail for totals in Question 2C: (Report only for last pay period(s) in month.)					
REGULAR EMPLOYEES — full and part time:					
A. Paid monthly .....					
B. Paid half-monthly — second half only .....					
C. Paid fortnightly — last two weeks only .....					
D. Paid weekly — last week in month only .....					
E. Other period (specify) .....					
CASUAL WORKERS employed for part of last week in month paid by:					
F. Day: Man-days: No. ....					
G. Hour: Man-hours: No. ....					
OTHER PAYMENTS — state type:					
H. ....					
I. ....					
J. ....					
TOTALS (to agree with 2C) .....					

4. Female Employees: Number

A. Women on salary .....  
B. Women wage-earners .....  
C. Total women .....

Change name or address if necessary.

Request file copies if required.

5. Report for male and female wage-earners whose hours are recorded.

A. Pay period from ..... to .....  
B No. of days establishment operated in this pay period .....  
C. Wage-earners whose hours are recorded: No. .... Office use .....  
D. Hours worked and hours of paid absence: No. ....  
E. Gross wages paid for these hours: (omit cents) \$ .....

6. Number of days and hours in standard work week of your establishment for:

A. Wage-earners: Days ..... Hours .....  
B. Salaried staff: Days ..... Hours .....

7. If a public holiday was observed in reported pay period(s) state numbers of employees absent:

With pay ..... Without pay .....

8. Please explain big differences from last report in employees pay hours etc.

Signature ..... Date .....  
9-ES1a - Monthly Employment Report ..... Official title .....  
Required under the Statistics Act of Canada Chap. 257 R.S.C. 1952

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, roulemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** - Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**Dominion Bureau of Statistics**

**EMPLOYMENT SECTION**

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,  
June 1, 1951**

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**AUGUST 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

November 1962  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 8

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
AUGUST, 1962

---

Summary

The industrial composite index of employment (1949=100) rose by 0.8 p.c. to 126.3 between July and August. The rise reflected increases in forestry, manufacturing, construction and service. There was a small decrease in mining. Employment in the remaining industrial divisions was virtually unchanged. About three quarters of the overall gain occurred in manufacturing where both major components advanced. In non-durables, a major part of the increase occurred in the food and beverage group as the canning season got underway. In durables, employment rose in transportation equipment following the July shutdowns in the automobile industries for model changeover and inventory taking.

Seasonally adjusted, the industrial composite showed a small decline. The reduction reflected minor decreases in the adjusted indexes for a majority of the industrial divisions. Only forestry and service showed increases.

The industrial composite of average weekly wages and salaries in August, at \$30.35, was 5 cents lower than in July. The latest figure was \$2.58 above that for the corresponding month last year.

The payroll index for August was 240.8. This was 0.7 p.c. above July 1962 and 5.3 p.c. above August 1961.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing declined by 0.3 p.c. to 113.6 between July and August. The decline was reflected in the durables sector where an industrial dispute in non-metallic mineral products was the main factor in the decreases. There was a fractional fall in the adjusted non-durables index.

Employment rose between July and August in all major groups within durable goods manufacturing except non-metallic mineral products. The gains were a little more than seasonal in electrical apparatus and supplies. In wood, non-ferrous metal and iron and steel products the changes in employment were about average for the time of year. Employment in transportation equipment rose less than seasonally.

In iron and steel products there were larger-than-usual increases in machinery and primary iron and steel. The settlement of a major industrial dispute in Quebec contributed to the rise in machinery. The gains in these two industries were offset by a marked decline in agricultural implements as firms prepared for their 1963 production runs.

In transportation equipment there were increases in motor vehicle parts and accessories and shipbuilding and repairs which were larger than seasonal.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The rise in the former was a result of a shorter-than-usual annual shut-down. These gains were outweighed by a smaller-than-average rise in the motor vehicles industry where the annual shut-down for the model changeover spanned two survey periods. A rise in aircraft and parts and a small decline in railroad and rolling stock equipment were mainly seasonal.

In non-durable goods manufacturing there were larger-than-seasonal increases in food and beverage, miscellaneous manufacturing, rubber products and paper products. These gains were offset by advances which were smaller than seasonal in clothing and leather products and by a marked decline in chemical products. An industrial dispute in Quebec contributed to the decrease in chemicals.

#### Non-Manufacturing Industrial Divisions

The seasonally adjusted indexes for forestry and service rose over the month. The adjusted indexes for mining, public utility operation and finance, insurance and real estate showed little or no change. There were declines in trade, construction and transportation, storage and communication. The decrease in trade reflected a contra-seasonal reduction in the retail component. Construction employment continued to follow the downward trend in evidence since March 1962. The August figure at 123.0 was 3.5 p.c. below the index for March 1962, but about 2.0 p.c. above the cyclical low recorded in April 1961.

#### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries was down 5 cents from July to \$80.85 in August. The small decline reflected lower average earnings in forestry, manufacturing and trade. The fall in manufacturing occurred in the non-durables sector where a large increase in the number of seasonal employees in the canning industry was a factor; reduced average earnings and employment in chemical products where earnings are above the national average also contributed. The only significant increase occurred in construction where longer hours in the building and general engineering component raised per capita earnings.

9-ES1a - Monthly Employment Report ..... Official title .....  
Required under the Statistics Act of Canada Chap. 257 R.S.C. 1952

**AUGUST**

**O. H. M. S.**

NO POSTAGE  
REQUIRED

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent **without** pay throughout the pay period.

**Salaries** **Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** - Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan.....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

SEPTEMBER 1962

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

December 1962  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 9

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year**

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year**

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year**

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year**

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 — Review of Employment and Payrolls—Annual—Price \$1.00**

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents**

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents**

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents**

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 — Labour Income, 1926-58 — Price 75 cents**

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
SEPTEMBER, 1962

---

Summary

The industrial composite index of employment (1949=100) for September was down 0.5 p.c. from August to 126.4. Most industrial divisions showed lower levels of employment as firms reduced their staffs with the oncoming of fall. These declines were partly offset by seasonal increases in forestry and trade. Seasonally adjusted, the composite declined by 0.2 p.c. to 121.6. The decline reflected decreases in the seasonally-adjusted indexes for a majority of the major industrial divisions.

The industrial composite of average weekly wages and salaries rose to \$81.37 in September, up 57 cents from August. The increase reflected an advance of \$1.76 in durable goods manufacturing where increased staffs and a longer work week raised per capita earnings.

The payroll index for September rose slightly from 241.0 to 241.5. The September figure was 5.9 p.c. above the same month last year.

Employment Review, January to September 1962

The seasonally-adjusted composite index of employment rose from 119.9 in December 1961 to 121.5 in May. The index then made a small advance to 121.9 in July and August but declined to 121.6 in September, virtually the same as May.

Manufacturing reported moderate gains from May to September largely due to buoyancy in the durables division; non-durables showed a small decline over the same period. There were signs of weakening in the remaining goods-producing industries. Forestry, although erratic, generally declined. Mining moved upward from February to June but has fallen steadily since. Employment in construction recorded successive month-to-month declines after March.

Manufacturing

After an increase of 1.9 p.c. from December to May employment in manufacturing rose by 0.6 p.c. between May and September. The reduced rate of growth reflected slackening in the non-durables component which showed a net decline of 0.6 p.c. from May to September. On the other hand, employment in durables rose substantially; the September index at 113.9 was 2.0 p.c. above the May figure.

The weakening that occurred in most goods-producing industries in 1962, was absent in durables. The strength in the division has been mainly in iron and steel products, electrical apparatus and supplies and non-metallic mineral products, although the last named industry group declined sharply in August as a result of industrial disputes in the glass products industry. Employment in wood products has steadily improved since May after slackening in the first quarter. Non-ferrous metal products showed little change during 1961 and the first quarter of 1962 but improved steadily after that time; a major industrial dispute in Quebec brought about the decline in September.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

For footnotes (a) to (w) see page iii.

Employment in transportation equipment has fluctuated since the cyclical low yearly in 1961 due mainly to industrial disputes in Canada and the United States. In general, the trend has been upward although in 1962 it was distorted during the summer months as shutdowns in the motor vehicle industry spanned two pay periods and those in parts and accessories were shorter than usual.

Among the component industries in transportation equipment, shipbuilding and repairs displayed strength in 1962. The motor vehicle and motor parts and accessories industries showed overall improvements although trends in these industries were distorted during the summer. Aircraft and parts and railroad and rolling stock fell off in 1962 after advancing in the latter part of 1961.

An outstanding feature of the expansion in 1961 was the strength shown by non-durable goods manufacturing. From the low in March 1961 until the end of the year, this component rose by 2.3 p.c. or an average of almost 0.3 p.c. a month. Between December 1961 and May 1962 the division continued to record significant gains, although industrial disputes dampened progress in the first quarter. There was little change over the summer of 1962 but in September the index fell to 109.9, 0.5 p.c. below the May figure.

During the current year employment in rubber, textile and paper products and miscellaneous industries has steadily improved. These gains have been largely offset by reductions in the second and third quarters in food and beverages, leather products and printing, publishing and allied industries.

#### Non-Manufacturing Industries

Forestry has generally declined in 1962. Mining showed marked improvement only in the first 6 months. Construction has decreased steadily, falling by 3.9 p.c. from March to September.

In general, employment in the service-producing industries has continued to expand. Service has not advanced in 1962 at the rapid rate characteristic of the division in 1961; from January to September in 1962 the index rose by 1.4 p.c. while over the same period in 1961 the rise was 5.5 p.c. In trade, employment was fairly buoyant in the first half of the year but has levelled since June mainly due to slackening in the retail component. Apart from a large strike in trucking in the second quarter, employment levels in transportation, storage and communication showed no significant change. The erratic movements in public utility operation in 1962 may be associated with changing seasonal patterns.

Table 2.- Seasonally-Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, by Industrial Division

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949 = 100

\*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

# INDEX NUMBERS OF EMPLOYMENT, CANADA, INDUSTRIAL DIVISION

1949 = 100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported September 1962
		Sept. 1962	Aug. 1962	Sept. 1961	Sept. 1960	Sept. 1962	Aug. 1962	Sept. 1961	Sept. 1960	
	%	1949 = 100				dollars				number
Forestry (chiefly logging) .....	76	85.4	80.2	85.3	101.3	81.28	80.08	75.23	76.12	62,581
Mining .....	96	118.1	120.7	118.5	123.2	99.04	98.39	96.32	93.62	104,659
Metal mining .....		133.1	136.2	132.7	138.0	99.42	100.17	98.19	95.85	63,029
Gold (a) .....		68.6	69.9	70.0	73.4	80.59	81.57	80.13	76.53	15,648
Other metal (b) .....		193.1	197.8	191.3	198.1	105.64	106.23	104.33	102.52	47,381
Iron .....		313.0	316.3	266.0	237.3	118.08	120.62	115.60	113.42	10,444
Uranium .....		..	..	..	..	108.32	109.23	115.66	112.07	4,769
Fuels .....		82.3	82.9	85.4	91.9	105.04	102.99	97.81	93.43	25,332
Coal .....		39.1	37.7	42.9	50.9	79.63	75.58	72.62	73.95	9,675
Oil and natural gas .....		258.8	267.3	267.7	268.3	120.73	118.75	115.09	109.43	15,657
Non-metal (c) .....		155.4	161.6	150.7	147.8	88.21	84.72	86.35	84.45	16,298
Asbestos .....		184.8	183.9	180.7	179.5	97.05	97.15	98.49	95.54	6,955
Manufacturing .....	92	117.5	117.6	112.8	111.6	83.86	82.62	81.15	78.37	1,274,647
Durable goods (u) .....		120.6	119.5	112.5	111.6	91.25	89.49	88.24	85.09	595,883
Non-durable goods (u) .....		115.0	116.0	113.0	111.7	77.35	76.69	75.21	72.75	678,759
Food and beverages .....		129.9	134.5	129.6	129.9	69.95	69.88	68.81	66.57	182,741
Meat products .....		135.9	137.9	140.2	139.4	82.77	82.49	81.01	78.12	30,829
Dairy products .....		125.3	133.1	129.5	127.9	70.53	69.63	67.96	64.94	15,321
Canned and cured fish .....		152.8	184.0	142.8	136.5	44.64	43.41	41.77	42.97	17,453
Canned and preserved fruits and vegetables .....		205.4	221.8	201.5	207.9	52.80	54.06	54.14	52.17	28,757
Grain mill products .....		99.5	99.9	104.5	105.0	83.21	82.48	80.92	77.45	9,694
Bread and other bakery products .....		112.5	113.8	112.1	113.4	70.12	69.69	68.49	66.01	23,127
Biscuits and crackers .....		102.2	101.2	97.8	96.0	64.36	64.07	64.16	60.22	7,557
Distilled and malt liquors .....		96.2	97.5	100.5	105.3	102.27	101.40	98.08	93.28	13,451
Other beverages (d) .....		154.3	161.3	152.2	149.8	72.05	73.94	72.06	69.68	11,320
Confectionery .....		101.7	93.8	97.0	100.0	60.91	59.92	59.03	57.50	9,988
Tobacco and tobacco products .....		80.5	81.1	80.6	78.8	86.04	86.72	81.89	82.25	8,188
Rubber products .....		109.5	108.4	102.9	102.7	87.05	85.92	85.92	80.83	21,769
Leather products .....		89.6	89.4	88.9	85.8	57.00	56.38	55.77	52.90	29,714
Boots and shoes (except rubber) .....		96.7	96.6	94.7	93.5	54.62	54.31	52.88	50.41	20,643
Other leather products (f) .....		76.8	76.3	78.9	72.3	62.43	61.11	61.86	58.57	9,071
Textile products (except clothing) .....		83.6	82.8	80.2	77.4	67.76	66.71	65.52	63.02	62,581
Cotton yarn and broad woven goods .....		75.1	74.6	74.8	67.7	64.76	63.39	63.22	59.30	18,474
Woollen goods .....		63.0	63.7	62.4	64.0	63.37	62.79	61.75	59.32	9,527
Synthetic textiles and silk (t) .....		93.6	92.8	85.1	83.9	73.81	72.93	71.22	69.56	16,023
Clothing (textile and fur) .....		96.1	95.4	94.1	92.5	53.24	52.71	51.90	49.00	104,368
Men's clothing .....		99.5	98.6	95.0	92.2	52.08	50.92	51.00	47.31	35,049
Women's clothing .....		104.6	103.5	104.7	100.7	54.49	55.02	53.20	49.91	28,748
Knit goods .....		75.8	75.3	74.1	75.7	52.73	52.20	51.18	49.63	19,598
Fur goods .....		66.7	66.2	68.5	70.4	75.01	76.25	73.28	67.43	3,118
Wood products .....		112.1	114.6	108.6	106.0	73.87	71.20	71.57	69.07	105,714
Saw and planing mills (g) .....		114.1	113.2	111.8	107.3	75.52	72.30	73.36	71.01	67,877
Furniture .....		121.7	120.1	114.1	114.0	73.01	71.22	70.45	67.27	28,093
Other wood products (h) .....		82.8	85.7	82.4	84.6	64.79	63.46	62.71	62.09	9,744
Paper products .....		130.1	131.3	127.4	127.5	99.15	97.84	95.47	93.30	97,694
Pulp and paper mills .....		130.7	132.6	128.2	128.9	107.11	105.13	102.90	100.83	69,225
Other paper products (i) .....		123.8	123.1	125.6	124.1	79.79	79.75	77.70	74.89	28,469
Printing, publishing and allied industries .....		126.9	125.7	125.5	124.5	91.79	90.82	88.79	85.75	62,096
Iron and steel products .....		113.4	112.9	104.5	102.7	96.48	95.30	93.40	89.68	184,659
Agricultural implements .....		59.7	55.0	47.1	53.5	99.21	97.55	95.89	89.04	10,508
Boilers and plate work .....		125.6	126.6	113.1	115.7	93.95	91.72	91.25	87.85	7,921
Fabricated and structural steel .....		161.6	164.4	153.4	136.3	99.81	95.41	94.18	89.99	12,107
Hardware and tools .....		110.4	109.9	102.6	98.5	85.11	83.51	82.88	80.05	12,606
Heating and cooking appliances .....		110.1	110.2	104.2	96.8	84.54	81.90	81.36	77.98	9,417
Iron castings .....		97.7	97.3	95.0	89.9	91.81	90.61	90.73	84.42	19,238
Machinery (j) .....		115.7	114.5	106.4	104.0	92.85	90.38	88.49	86.04	36,513
Industrial machinery (r) .....		131.1	129.5	117.7	113.6	93.56	91.18	88.63	86.66	28,494
Primary iron and steel .....		129.8	130.2	121.1	117.3	109.61	109.35	106.13	102.66	38,897
Sheet metal products .....		124.2	126.6	107.1	111.8	94.90	97.38	93.05	91.31	19,373
Wire and wire products .....		111.9	111.2	110.8	115.8	95.02	94.96	94.71	87.55	9,232

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS, SEPTEMBER, 1962

Important  
Instructions on other side

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

1. If you had any employees drawing pay in last pay period(s) in above month please fill in this form. If not when will you operate? .....
2. **Employees drawing pay** in last pay period(s) in month and their **gross payroll to nearest dollar.**

A. Salaried employees - No. .... B. Wage-earners - No. .... C. Total employees - No. ....  
Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payrolls - \$ .....

3. **Payroll detail for totals in Question 2C.**  
(Report only for last pay period(s) in month.)

Paid in salaries — \$	Paid in wages	Dates of pay period(s)	Employees receiving pay	Gross earnings in pay period(s) (omit cents)	Office use
3. Payroll detail for totals in Question 2C. (Report only for last pay period(s) in month.)					
REGULAR EMPLOYEES — full and part time:					
A. Paid monthly .....					
B. Paid half-monthly — second half only .....					
C. Paid fortnightly — last two weeks only .....					
D. Paid weekly — last week in month only .....					
E. Other period (specify) .....					
CASUAL WORKERS employed for part of last week in month paid by:					
F. Day: Man-days: No. ....					
G. Hour: Man-hours: No. ....					
OTHER PAYMENTS — state type:

TOTALS (to agree with 2C) .....					

4. **Female Employees:** Number

A. Women on salary .....  
B. Women wage-earners .....  
C. Total women .....

Change name or address if necessary.

Request file copies if required.

Signature ..... Date .....  
9-ES1a - Monthly Employment Report ..... Required under the Statistics Act of Canada Chap. 257 R.S.C. 1952

Official title

Required under the Statistics Act of Canada Chap. 257 R.S.C. 1952

5. **Report for male and female wage-earners**  
whose hours are recorded.

A. Pay period from ..... to .....  
B No. of days establishment operated in this pay period .....

C. Wage-earners whose hours are recorded:  
No. .... Office use

D. Hours worked and hours of paid absence:  
No. ....

E. Gross wages paid for these hours: (omit cents)  
\$ .....

6. Number of days and hours in standard work week of your establishment for:

A. Wage-earners: Days ..... Hours .....  
B. Salaried staff: Days ..... Hours .....

7. If a public holiday was observed in reported pay period(s) state numbers of employees absent:

With pay ..... Without pay .....

8. Please explain big differences from last report in employees pay hours etc.

## INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, roulemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** - Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,  
June 1, 1951**

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page 1.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**OCTOBER 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

January 1963  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 10

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year**

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year**

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year**

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year**

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 — Review of Employment and Payrolls—Annual—Price \$1.00**

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents**

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents**

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents**

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 — Labour Income, 1926-58 — Price 75 cents**

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
OCTOBER, 1962

---

Summary

The industrial composite index of employment (1949=100) declined over the month by 0.9 p.c., to 125.4 in October. Most major industrial divisions showed reductions; the exceptions were forestry, trade and finance, insurance and real estate which normally record increases between these months. Seasonally-adjusted, the composite was unchanged at 121.7 as the movement of the major industrial divisions was offsetting.

The seasonally-adjusted index for manufacturing showed no change as a rise in the non-durables component was outweighed by a decline in durables. The rise in the adjusted non-durables index reflected, mainly, a smaller-than-seasonal decline in food and beverages. The decrease in durables resulted from reductions that were larger than usual in iron and steel, transportation equipment and non-ferrous metals.

The industrial composite of average weekly wages and salaries rose by 19 cents to \$81.59 in October. Most industrial divisions showed higher levels of earnings over the month; the only decreases were in construction, trade and finance insurance and real estate. The payroll index fell by 0.7 p.c. to 240.2 in October. The latest figure was 5.3 p.c. above the same month last year.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing was unchanged from September to October at 114.1 as there were offsetting movements in the major components. The adjusted durables index declined by 0.3 p.c. to 118.7 while that for non-durables rose by 0.4 p.c. to 110.3.

The decline in durables reflected lower employment levels in iron and steel products, transportation equipment and non-ferrous metal products. There was some strengthening in non-metallic mineral products, as one major industrial dispute terminated, but employment was still significantly below pre-strike levels. Wood products and electrical apparatus and supplies continued to improve.

The decline in employment in iron and steel products was primarily a result of larger-than-usual reductions in primary iron and steel and sheet metal products. Except for agricultural implements, which rose less than seasonally, the remaining component industries recorded typical seasonal variations.

In transportation equipment, a marked employment decline in aircraft and parts prevented the usual September to October rise in the industry group. The automobile industries continued to increase their staffs, the advance in the parts and accessories industry being above average. Employment declined more than seasonally in railroad and rolling stock equipment, reflecting the completion of a large order. There was a small seasonal decline in shipbuilding and repairs.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The seasonally-adjusted index for non-durable goods manufacturing rose over the month. The increase reflected smaller-than-usual reductions in food and beverages and leather products. Except for clothing, in which employment fell a little more than seasonally, the changes in the remaining industries followed usual seasonal patterns.

#### Non-Manufacturing Industries

The seasonally-adjusted indexes for a majority of the non-manufacturing industries showed improvement over the month. However, these gains were offset by declines in forestry, mining and service. The drop in mining reflected reductions in the metals group, particularly in the Ontario region.

#### Average Weekly Wages and Salaries

The industrial composite of weekly wages and salaries rose by 19 cents to \$81.59 in October. In general, the increase resulted from seasonal layoffs of lower-paid employees in most industries.

Weekly earnings in manufacturing rose by 48 cents reflecting significant increases in food and beverages, rubber products and transportation equipment. The release of seasonal workers in the canning industry raised average earnings in food and beverages. In transportation equipment average earnings rose markedly in the automobile industry due to a substantial increase in the average work week.

Table 2.- Seasonally-Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, by Industrial Division

REQUIRED

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** - Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

**Dominion Bureau of Statistics**

**EMPLOYMENT SECTION**

**OTTAWA**

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

## EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

**NOVEMBER 1962**

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

February 1963  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 11

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 — Advance Statement on Employment and Weekly Earnings — Monthly — Price \$1.00 per year**

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 — Man-Hours and Hourly Earnings — Monthly — Price \$3.00 per year**

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 — Estimates of Labour Income — Monthly — Price \$2.00 per year**

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 — Hiring and Separation Rates in Certain Industries — Semi-Annual — Price \$1.50 per year**

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 — Review of Employment and Payrolls — Annual — Price \$1.00**

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 — Review of Man-Hours and Hourly Earnings — Annual — Price 75 cents**

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 — Earnings and Hours of Work in Manufacturing — Annual — Preliminary Report — Price 25 cents**

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 — Earnings and Hours of Work in Manufacturing — Annual — Final Report — Price 75 cents**

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 — Labour Income, 1926-58 — Price 75 cents**

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## NOTICE

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
NOVEMBER, 1962

---

Summary

The industrial composite index of employment (1949=100) declined by 1.0 p.c. to 124.2 during November as many establishments reduced staffs with the oncoming of winter. Decreases were recorded in every industrial division except trade and finance, insurance and real estate. The usual pre-Christmas rise occurred in trade. The increase in finance, insurance and real estate was fractional.

Seasonally adjusted, the industrial composite rose from 121.7 in October to 122.1 in November. Advances occurred in the adjusted indexes of nearly all industrial divisions, but most of the overall gain took place in manufacturing and construction. The only significant decline was in mining.

Average weekly wages and salaries at \$81.58 were virtually unchanged from October. The latest figure was \$2.76 above November 1961. The payroll index declined from 240.1 in October to 238.0 in November. The November index was 5.7 p.c. above the same month last year.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing advanced by 0.4 p.c. to 114.5 in November, continuing the steady rise in evidence all through 1962. The latest month-to-month change was mainly a result of improvement in the durables division where the adjusted index rose by 0.6 p.c. to 119.5. This figure was 1.4 p.c. above the 1959 high of 117.9 but was substantially below the record post-war high recorded in the first quarter of 1957.

The rise in the seasonally-adjusted index for durable goods manufacturing reflected improvement in most component industries. The termination of a major industrial dispute in non-metallic mineral products resulted in an increase in employment, contrary to the usual seasonal movement in that industry. There were smaller-than-seasonal declines in iron and steel products, non-ferrous metals and electrical apparatus and supplies. The drop in wood products and the small advance in transportation equipment were seasonal.

In iron and steel products, there were smaller-than-seasonal declines in primary iron and steel and in machinery products. On the other hand employment in fabricated and structural steel and sheet metal products fell more than seasonally. In transportation equipment there were contra-seasonal increases in motor vehicle parts and accessories and railroad and rolling stock equipment, but these were offset by a contra-seasonal decline in aircraft and parts.

The seasonally adjusted index for non-durable goods manufacturing showed a slight rise from October to November. In general, the movement of component industries conformed to seasonal patterns. Exceptions were the paper and rubber product industries in which employment declined less than seasonally.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

### Non-Manufacturing Industries

Among the non-manufacturing industrial divisions, the seasonally-adjusted employment indexes were virtually unchanged from October for the service producing industries but differed markedly from the previous month for the goods producing industries. Employment rose in forestry and construction but fell in mining. The increase in the seasonally-adjusted index for construction was the first in several months and reflected smaller-than-seasonal decreases in both major components. The adjusted mining index declined as a result of a larger-than-usual reduction in non-metals.

Although the adjusted indexes for the service producing industrial divisions recorded little change, within some divisions, major components showed offsetting movements. In transportation, storage, and communication most industry groups showed some improvement, but this was balanced by a decline in steam railways which was above average. In trade, the wholesale component was almost unchanged although it usually declines between these months. This strengthening was offset by smaller-than-usual increases in retail trade.

### Average Weekly Wages and Salaries

The movement of per capita earnings for most of the major industrial divisions was moderate. Forestry and mining which rose by \$1.86 and \$1.09, respectively, recorded the only significant increases. There were small decreases in construction and in trade.

Table 2.- Seasonally-Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, by Industrial Division

### INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** — Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent **without** pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** — Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** — Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** — Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** — Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** — State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

### EMPLOYMENT SECTION

OTTAWA

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

March 1963  
8003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 12

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings** — Monthly — Price \$1.00 per year  
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings** — Monthly — Price \$3.00 per year  
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income** — Monthly — Price \$2.00 per year  
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries** — Semi-Annual — Price \$1.50 per year  
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls** — Annual — Price \$1.00  
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings** — Annual — Price 75 cents  
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing** — Annual — Preliminary Report — Price 25 cents  
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing** — Annual — Final Report — Price 75 cents  
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:  
(1) a segregation of office and clerical workers from the salaried group  
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings  
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents  
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## N O T I C E

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

CYCLICAL TRENDS IN EMPLOYMENT  
1960 - 1962

---

Trends in Major Industrial Divisions and the Industrial Composite

During 1962, there was a continuation of the upward movement in the seasonally-adjusted industrial composite index of employment (1949=100) that began early in 1961. The rate of increase in the latter part of 1962 was not as great as in the preceding twelve months.

The 1961-62 period of increases followed a period of declines, in which the seasonally-adjusted composite index decreased from 120.7 (in October 1959) to 116.5 (in March 1961), a reduction of 3.5 p.c. Over three quarters of the loss was regained in 1961, with the adjusted index rising to 119.9 in December of that year. The index rose above the October 1959 cyclical peak level early in 1962, and continued to gain through the rest of the year. The December figure was 122.4, about 1.0 p.c. below the all-time peak in the adjusted composite index reached in the Spring of 1957.

The goods-producing industries are, in general, more sensitive to cyclical factors than the service-producing industries, and most of the 1959-61 decrease occurred in the goods-producing sector. Reductions of 8 p.c. or more were recorded for each industry in the group except non-durable goods manufacturing where the decline was less than 1 p.c. Typically, non-durables is less affected by recessionary influences than other goods-producing industry divisions, because it consists largely of industries producing consumer goods for immediate consumption. In the service producing divisions, transportation, storage and communication and public utility operation declined, the reduction in the former being almost 5.0 p.c. Employment in trade was almost unchanged throughout the recession. Service and finance, insurance and real estate continued to record increases.

During the strong recovery in 1961 employment rose substantially in all the goods-producing industry divisions. The most significant advance was in durable goods manufacturing in which the adjusted index rose by over 5.0 p.c. Employment in non-durables is usually relatively insensitive to cyclical swings in employment; however, from March 1961 to the end of the year the division rose by 2.3 p.c. There were advances in all service producing industrial divisions except transportation, storage and communication. The largest percentage increase was in service which rose by 6 p.c.

In 1962, durable goods manufacturing continued to rise as rapidly as in 1961, and the rate of advance in non-durables slackened only slightly. Both forestry and construction tended to weaken during 1962. Mining indicated some strengthening in the first half but steadily declined in the second. In the service divisions, public utility operation and service rose at a reduced rate. For service, the change from December 1961 to December 1962 was 3.1 p.c. as against a rise of 6.8 p.c. from December 1960 to December 1961.

Employment Trends in Manufacturing

Between October 1959 and March 1961 the employment index for the manufacturing division declined from 112.1 to 107.2. The reduction reflected a fall

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

of 9.1 p.c. in the durables component. During the remainder of 1961 most of the loss was recovered as employment in non-durables showed strength. Over the first half of 1962 both components continued to show marked increases with the pace in non-durables slackening somewhat. As a result, by July 1962 the manufacturing index stood at 113.9, considerably above the October 1959 peak of 112.1. Over the last half of the year manufacturing continued to improve, almost entirely because of continued progress in the durables component.

### Durable Goods Manufacturing

All industry groups in durable goods manufacturing declined between the fall of 1959 and the spring of 1961 with reductions in iron and steel and transportation equipment accounting for almost two-thirds of the overall decrease. Between March and December 1961, all the groups except non-ferrous metal products showed improvement, with the largest gains being recorded in electrical apparatus and supplies and non-metallic mineral products.

During 1962, the trends apparent in 1961 were maintained. Electrical apparatus and supplies and non-metallic mineral products continued to advance strongly and by the end of the year had surpassed the peak levels of 1959. Of more significance because of the numbers employed therein, was the continued improvement in transportation equipment and the accelerated growth in iron and steel products. Non-ferrous metals showed some improvement in the first half of the year but weakened thereafter.

Iron and Steel Products: All components of iron and steel products declined sharply between October 1959 and March 1961. Some industries continued to weaken even after the cyclical low was reached in March 1961; fabricated and structural steel, sheet metal products and agricultural implements were the most notable of these. There was immediate improvement in primary iron and steel, iron castings and heating and cooking appliances, while machinery products began to pick up at about the middle of 1961. During the first half of 1962 all industry groups except agricultural implements rose substantially with the advances in primary iron and steel and iron castings being particularly strong. In the second half of 1962 some of these trends were reversed. Fabricated and structural steel, sheet metal products and iron castings slackened while there was expansion in agricultural implements and machinery.

Transportation Equipment: In transportation equipment all component industries except aircraft and parts declined between October 1959 and March 1961. The situation in aircraft and parts was unsettled because of the heavy layoffs in the industry in the first quarter of 1959. During 1961 all components made some advances although the improvement in the automobile industries and shipbuilding and repairing was the most marked. These same industries continued to record substantial gains throughout 1962. However, 1962 also saw a contraction in the aircraft and parts industry.

### Non-Durable Goods Manufacturing

Most components of non-durable goods manufacturing levelled during the recession of 1959-61. Only rubber, textile and clothing products showed significantly reduced levels of employment. On the other hand these same industries made steady gains during the 1961-1962 recovery although textile products and clothing showed signs of levelling in the last half of 1962. Most industry groups strengthened during the last half of 1961 and the first six months of 1962. A notable

# EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

(COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

exception was paper products which showed little change in 1961 although it advanced rather strongly through most of 1962. Apart from paper products, only rubber products and miscellaneous manufacturing industries continued to expand over the last half of 1962. The apparent weakening in chemical products reflected an industrial dispute which began in August and continued to affect the industry at year's end.

### Non-Manufacturing Industries

#### Goods-Producing Industry Divisions

As already mentioned, forestry, mining and construction declined sharply during the recession and in no case has employment risen above levels reached in the second half of 1959. In forestry and mining, this partly reflected long term trends towards reduced levels of employment in particular areas or segments within the divisions. The advance in construction in 1961 and its decline in 1962 reflected almost entirely the movement of the building and general engineering component.

The overall decline in the mining index was due mainly to reductions in metals and fuels; non-metal mining has been a source of strength. In 1962, there was a mild recovery in metal mining until about the middle of the year but after that time the index fell sharply. In recent years, frequent periodic layoffs in coal mining has further depressed the total mining index and account largely for its erratic movement. Non-metal mining, on the other hand, started to improve in 1960 and since that time has moved steadily upwards although there was some slackening in the last half of 1962.

#### Service-Producing Industry Divisions

Between October 1959 and March 1961, transportation, storage and communication was the only service-producing division which recorded a marked decline. Since early 1961, the adjusted employment index for the division has fluctuated between 108.0 and 109.0, except for a few months in 1962 which were distorted by a major industrial dispute in the trucking industry.

All major components of the division contributed to the decline but reductions in the transportation group were the most important. During the recovery, the transportation group rose slightly in 1961 but levelled in 1962. Storage steadily weakened through 1961 and the first half of 1962 but indicated some strengthening in the second half of 1962. Employment in communication did not turn upward until early in 1962 but rose strongly over the remainder of the year.

In transportation, most industry groups weakened between 1959 and 1961 but reductions in railway employment was the main factor in the overall decline. Employment in railways has decreased since 1956 due to factors of a long term nature. Water transportation which has declined for several years, indicated some reversal of this trend in 1962. The upward trend in truck transportation was arrested in 1960 but continued in 1961, however some levelling was indicated towards the end of 1962. Air transport and airports rose steadily throughout the recession and period following.

Table 2.- Seasonally-Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, by Industrial Division

1949 = 100

TABLE 3. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported  December 1962
		Dec. 1962	Nov. 1962	Dec. 1961	Dec. 1960	Dec. 1962	Nov. 1962	Dec. 1961	Dec. 1960	
	%	1949 = 100				dollars				number
Forestry (chiefly logging) .....	76	78.5	85.8	80.8	89.4	77.98	84.64	75.90	74.74	57,679
Mining .....	96	112.3	114.3	115.1	113.1	96.17	100.70	95.15	94.96	99,496
Metal mining .....		125.1	127.8	128.5	130.3	97.83	101.43	97.27	98.00	59,185
Gold (a) .....		67.0	68.6	68.3	70.9	82.01	83.59	78.99	77.66	15,257
Other metal (b) .....		179.0	182.7	184.5	185.5	103.32	107.64	103.55	105.24	43,928
Iron .....		286.1	296.5	248.1	255.0	116.49	117.32	112.44	106.97	9,548
Uranium .....		..	..	..	..	108.77	113.89	114.55	117.00	4,627
Fuels .....		86.5	84.7	89.8	83.3	98.47	104.78	95.71	94.13	26,618
Coal .....		39.7	39.6	43.2	37.2	60.75	76.17	66.96	62.10	9,826
Oil and natural gas .....		277.5	268.6	289.7	281.7	120.54	122.04	114.09	112.35	16,792
Non-metal (c) .....		130.5	140.4	128.4	122.1	84.57	90.47	84.28	81.94	13,693
Asbestos .....		178.3	181.1	174.9	172.1	92.35	98.27	94.28	90.82	6,708
Manufacturing .....	92	111.1	114.7	107.9	104.1	80.81	84.55	80.16	77.92	1,205,384
Durable goods (u) .....		116.5	118.9	110.9	105.7	86.47	91.94	86.57	84.03	576,100
Non-durable goods (u) .....		106.6	111.2	105.5	102.7	75.63	77.93	74.52	72.65	629,284
Food and beverages .....		106.5	116.7	105.8	104.4	73.12	72.82	72.09	70.21	149,929
Meat products .....		130.4	137.0	129.9	128.7	81.12	82.25	80.37	78.38	29,577
Dairy products .....		115.1	118.7	117.3	115.1	71.32	71.20	69.01	66.55	14,387
Canned and cured fish .....		84.9	108.6	76.8	73.2	40.98	44.48	41.39	42.45	9,695
Canned and preserved fruits and vegetables .....		81.4	122.2	77.6	74.5	61.94	57.48	61.03	58.88	11,397
Grain mill products .....		93.4	95.6	99.1	99.6	79.09	83.19	77.45	75.08	9,104
Bread and other bakery products .....		112.0	113.0	110.8	109.7	70.47	69.68	69.01	67.21	23,041
Biscuits and crackers .....		85.5	93.0	81.3	86.9	64.81	65.12	61.12	57.55	6,318
Distilled and malt liquors .....		92.4	98.1	94.9	97.7	104.62	103.19	99.81	97.57	12,917
Other beverages (d) .....		143.6	143.1	145.8	140.4	75.62	74.19	75.56	72.38	10,535
Confectionery .....		88.4	99.0	85.0	87.3	54.23	60.03	54.05	53.89	8,686
Tobacco and tobacco products .....		92.4	98.5	107.5	115.6	77.58	77.25	69.41	63.18	9,400
Rubber products .....		107.2	109.7	100.7	84.7	83.87	89.26	81.27	78.00	21,316
Leather products .....		87.3	90.5	88.2	83.5	50.82	57.71	50.82	50.48	28,945
Boots and shoes (except rubber) .....		93.8	97.3	95.9	91.3	47.31	55.25	47.91	47.46	19,996
Other leather products (f) .....		75.7	78.3	74.2	70.0	58.67	63.22	57.61	57.37	8,949
Textile products (except clothing) .....		82.2	83.7	80.3	76.0	62.62	68.76	62.34	61.20	61,536
Cotton yarn and broad woven goods .....		73.3	74.4	75.2	68.7	57.85	65.68	58.13	57.19	18,028
Woolen goods .....		62.6	63.9	61.1	60.4	57.44	63.39	58.18	56.89	9,470
Synthetic textiles and silk (t) .....		93.9	93.8	86.7	81.9	71.99	76.37	70.57	69.16	16,067
Clothing (textile and fur) .....		88.9	92.7	87.7	85.6	45.99	51.71	45.96	45.20	96,516
Men's clothing .....		94.2	98.0	90.5	86.1	45.24	50.80	45.07	44.29	33,162
Women's clothing .....		93.7	96.5	93.5	90.8	45.25	51.22	45.28	44.37	25,749
Knit goods .....		69.9	75.6	72.3	72.4	46.35	53.33	46.22	45.51	18,075
Fur goods .....		60.5	63.0	62.4	62.8	68.03	72.12	69.61	66.45	2,831
Wood products .....		103.6	106.4	99.4	93.6	68.06	73.36	67.70	65.41	97,709
Saw and planing mills (g) .....		104.4	107.0	100.1	92.9	70.86	75.10	70.29	67.55	62,105
Furniture .....		116.1	119.1	109.7	106.3	64.31	72.21	64.89	62.90	26,797
Other wood products (h) .....		75.0	78.8	75.6	72.2	59.73	64.76	58.08	59.38	8,807
Paper products .....		125.2	127.3	122.5	121.8	96.41	98.10	95.31	92.36	93,985
Pulp and paper mills .....		125.7	126.2	123.0	123.3	106.32	107.06	104.75	101.24	66,556
Other paper products (i) .....		124.1	130.0	121.4	118.3	72.34	77.26	72.79	70.59	27,429
Printing, publishing and allied industries .....		124.3	126.3	124.3	123.3	88.18	91.28	86.31	83.89	60,797
Iron and steel products .....		109.4	111.7	102.0	98.7	90.06	96.19	89.77	87.52	178,273
Agricultural implements .....		68.5	65.8	59.6	60.3	89.53	99.17	94.34	90.53	12,046
Boilers and plate work .....		124.3	129.1	108.3	107.7	88.71	93.91	83.56	84.33	7,837
Fabricated and structural steel .....		150.6	154.3	146.7	153.4	90.23	97.92	90.42	88.41	11,321
Hardware and tools .....		111.4	112.2	103.0	95.7	79.05	84.89	78.78	78.14	12,727
Heating and cooking appliances .....		101.3	105.4	94.0	86.7	79.05	83.27	77.39	73.89	8,671
Iron castings .....		92.3	97.0	89.3	85.2	82.82	90.37	84.94	82.31	18,265
Machinery (j) .....		113.8	115.5	104.6	100.9	87.02	92.32	86.32	84.00	35,921
Industrial machinery (r) .....		129.5	131.6	116.8	109.7	86.47	92.71	86.89	84.45	28,155
Primary iron and steel .....		123.4	124.1	115.8	107.9	107.73	111.85	105.39	102.71	36,942
Sheet metal products .....		108.9	115.4	101.8	100.4	83.72	91.60	84.52	83.49	16,974
Wire and wire products .....		112.2	112.1	109.9	108.4	89.37	96.69	87.46	86.73	9,261

TABLE 7. Sex Distribution of Employees Reported, by Industries, Canada

Industries	December, 1962					November, 1962		December, 1961	
	Both sexes	Men	Women	Men	Women	Men	Women	Men	Women
	number			per cent					
Forestry (chiefly logging) .....	57,679	56,742	937	98.4	1.6	98.5	1.5	98.4	1.6
Mining .....	99,496	95,322	4,174	95.8	4.2	95.8	4.2	96.2	3.8
Metal mining .....	59,185	57,612	1,573	97.3	2.7	97.4	2.6	97.6	2.4
Gold (a) .....	15,257	14,987	270	98.2	1.8	98.2	1.8	98.5	1.5
Other metal (b) .....	43,928	42,625	1,303	97.0	3.0	97.1	2.9	97.3	2.7
Iron .....	9,548	9,067	481	95.0	5.0	95.2	4.8	95.4	4.6
Uranium .....	4,627	4,545	82	98.2	1.8	98.2	1.8	97.9	2.1
Fuels .....	26,618	24,484	2,134	92.0	8.0	91.8	8.2	92.7	7.3
Coal .....	9,826	9,702	124	98.7	1.3	98.7	1.3	98.9	1.1
Oil and natural gas .....	16,792	14,782	2,010	88.0	12.0	87.6	12.4	88.8	11.2
Non-metal (c) .....	13,693	13,226	467	96.6	3.4	96.7	3.3	96.7	3.3
Asbestos .....	6,708	6,522	186	97.2	2.8	97.2	2.8	97.3	2.7
Manufacturing .....	1,205,384	931,144	274,240	77.2	22.8	76.5	23.5	77.3	22.7
Durable goods (u) .....	576,100	505,240	70,860	87.7	12.3	87.7	12.3	88.0	12.0
Non-durable goods (u) .....	629,284	425,904	203,380	67.7	32.3	66.6	33.4	67.9	32.1
Food and beverages .....	149,929	112,688	37,241	75.2	24.8	72.5	27.5	75.7	24.3
Meat products .....	29,577	22,985	6,592	77.7	22.3	76.9	23.1	77.6	22.4
Dairy products .....	14,087	11,800	2,287	83.8	16.2	83.7	16.3	84.2	15.8
Canned and cured fish .....	9,695	7,200	2,495	74.3	25.7	70.3	29.7	75.9	24.1
Canned and preserved fruits and vegetables .....	11,397	7,257	4,140	63.7	36.3	52.6	47.4	64.2	35.8
Grain mill products .....	9,104	7,622	1,482	83.7	16.3	83.4	16.6	84.1	15.9
Bread and other bakery products .....	23,041	17,876	5,165	77.6	22.4	77.3	22.7	77.8	22.2
Biscuits and crackers .....	6,318	3,260	3,058	51.6	48.4	49.3	50.7	52.6	47.4
Distilled and malt liquors .....	12,917	11,268	1,649	87.2	12.8	84.1	15.9	86.6	13.4
Other beverages (d) .....	10,535	9,597	938	91.1	8.9	91.0	9.0	91.2	8.8
Confectionery .....	8,686	3,981	4,705	45.8	54.2	43.4	56.6	46.6	53.4
Tobacco and tobacco products .....	9,400	4,859	4,541	51.7	48.3	49.4	50.6	52.0	48.0
Rubber products .....	21,316	16,539	4,777	77.6	22.4	77.5	22.5	78.0	22.0
Leather products .....	28,945	15,958	12,987	55.1	44.9	54.5	45.5	55.0	45.0
Boots and shoes (except rubber) .....	19,996	10,315	9,681	51.6	48.4	50.9	49.1	51.5	48.5
Other leather products (f) .....	8,949	5,643	3,306	63.1	36.9	62.6	37.4	63.2	36.8
Textile products (except clothing) .....	61,536	41,547	19,989	67.5	32.5	66.7	33.3	67.4	32.6
Cotton yarn and broad woven goods .....	18,028	12,430	5,598	68.9	31.1	68.6	31.4	68.2	31.8
Woollen goods .....	9,470	5,908	3,562	62.4	37.6	61.7	38.3	62.9	37.1
Synthetic textiles and silk (t) .....	16,067	12,330	3,737	76.7	23.3	76.7	23.3	76.8	23.2
Clothing (textile and fur) .....	96,516	28,469	68,047	29.5	70.5	28.8	71.2	29.8	70.2
Men's clothing .....	33,162	10,321	22,841	31.1	68.9	30.5	69.5	31.9	68.1
Women's clothing .....	25,749	5,808	19,941	22.6	77.4	21.0	79.0	22.3	77.7
Knit goods .....	18,075	6,140	11,935	34.0	66.0	33.4	66.6	33.8	66.2
Fur goods .....	2,831	1,958	873	69.2	30.8	69.2	30.8	67.1	32.9
Wood products .....	97,709	89,280	8,429	91.4	8.6	91.4	8.6	91.3	8.7
Saw and planing mills (g) .....	62,105	58,424	3,681	94.1	5.9	94.1	5.9	94.1	5.9
Furniture .....	26,797	23,450	3,347	87.5	12.5	87.5	12.5	87.4	12.6
Other wood products (h) .....	8,807	7,406	1,401	84.1	15.9	84.3	15.7	84.1	15.9
Paper products .....	93,985	81,913	12,072	87.2	12.8	87.0	13.0	87.1	12.9
Pulp and paper mills .....	66,556	62,865	3,691	94.5	5.5	94.4	5.6	94.5	5.5
Other paper products (i) .....	27,429	19,048	8,381	69.4	30.6	69.6	30.4	69.7	30.3
Printing, publishing and allied industries .....	60,797	44,301	16,496	72.9	27.1	72.4	27.6	72.9	27.1
Iron and steel products .....	178,273	161,370	16,903	90.5	9.5	90.6	9.4	90.4	9.6
Agricultural implements .....	12,046	11,237	809	93.3	6.7	93.0	7.0	92.9	7.1
Boilers and plate work .....	7,837	7,288	549	93.0	7.0	93.3	6.7	92.6	7.4
Fabricated and structural steel .....	11,321	10,630	691	93.9	6.1	94.0	6.0	94.1	5.9
Hardware and tools .....	12,727	10,080	2,647	79.2	20.8	79.0	21.0	79.3	20.7
Heating and cooking appliances .....	8,671	7,690	981	88.7	11.3	89.1	10.9	89.0	11.0
Iron castings .....	18,265	17,063	1,202	93.4	6.6	93.3	6.7	93.3	6.7
Machinery (j) .....	35,921	31,629	4,292	88.1	11.9	88.2	11.8	87.7	12.3
Industrial machinery (r) .....	28,155	25,057	3,098	89.0	11.0	89.2	10.8	88.8	11.2
Primary iron and steel .....	36,942	35,479	1,463	96.0	4.0	96.1	3.9	95.8	4.2
Sheet metal products .....	16,974	14,630	2,344	86.2	13.8	86.4	13.6	85.8	14.2
Wire and wire products .....	9,261	8,046	1,215	86.9	13.1	86.8	13.2	87.1	12.9

Important  
Instructions on other side

DOMINION BUREAU OF STATISTICS - EMPLOYMENT, PAYROLLS AND MAN-HOURS, DECEMBER, 1962

PLEASE TYPE OR USE LEAD PENCIL WHEN COMPLETING FORM

1. If you had any employees drawing pay in last pay period(s) in above month please fill in this form. If not when will you operate?

2. Employees drawing pay in last pay period(s) in month and their gross payroll to nearest dollar.

A Salaried employees - No ..... B Wage-earners - No ..... C Total employees - No .....  
Paid in salaries - \$ ..... Paid in wages - \$ ..... Total payrolls - \$ .....

3. Payroll detail for totals in Question 2C.

(Report only for last pay period(s) in month.)

	Dates of pay period(s)		Employees receiving pay	Gross earnings in pay period(s) (omit cents)	Office use
	From	To			
3. Payroll detail for totals in Question 2C. (Report only for last pay period(s) in month.)					
REGULAR EMPLOYEES — full and part time					
A. Paid monthly					
B. Paid half-monthly — second half only					
C. Paid fortnightly — last two weeks only					
D. Paid weekly — last week in month only					
E. Other period (specify)					
CASUAL WORKERS employed for part of last week in month paid by:					
F. Day. Man-days. No.					
G. Hour. Man-hours. No.					
OTHER PAYMENTS — state type:					
H.					
I.					
J.					
TOTALS (to agree with 2C)					

4. Female Employees:

A. Women on salary ..... Number .....  
B. Women wage-earners .....  
C. Total women .....

Change name or address if necessary.

Request file copies if required.

5. Report for male and female wage-earners whose hours are recorded

A Pay period from ..... to .....

B No of days establishment operated in this pay period .....

C Wage-earners whose hours are recorded: No ..... Office use .....

D Hours worked and hours of paid absence: No .....

E Gross wages paid for these hours: (omit cents) \$ .....

6. Number of days and hours in standard work week of your establishment for:

A. Wage-earners: Days ..... Hours .....

B. Salaried staff: Days ..... Hours .....

7. If a public holiday was observed in reported pay period(s) state numbers of employees absent:

With pay ..... Without pay .....

8. Please explain big differences from last report in employees pay hours etc.

Signature ..... Date ..... Official title ..... Required under the Statistics Act of Canada Chap. 257 R.S.C. 1952  
9-ES1a - Monthly Employment Report

REQUIRED

## INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay **except** (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. **Totals in Questions 2 and 3 should agree.**

**Question 4** - Enter numbers of women, salaried employees and wage-earners, included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

If further directions are required, please write the Employment Section.

EMPLOYMENT SECTION

OTTAWA

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.
